INSTRUMENT TRANSFORMERS

VOZ-11G and VOY-11G
Outdoor voltage transformers

The VOZ-11G and VOY-11G voltage transformers are designed for outdoor metering and relaying applications.

Product features
- 15 kV, outdoor
- 110 kV BIL, 60 Hertz
- Electrical clearances:
  - Strike: 12.5" (317 mm)
  - Creep: 30.0" (762 mm)
- Minimum operating temperature: -50° C
- Approximate weight: 80 lbs. (36 kg)

Application
The VOZ-11G and VOY-11G outdoor voltage transformers are designed for outdoor metering and relaying applications.

Industry leading performance
An enhanced creep distance provides outstanding flashover resistance and increased surface area for better heat dissipation. Encapsulated in the advanced HCEP (hydrophobic cycloaliphatic epoxy) material, these units provide unparalleled performance in outdoor applications, including wet, polluted, or coastal environments.

Terminals
The electro-tin plated copper primary line terminals accommodate #10 to 250 MCM conductors. Clamp-type secondary terminals accommodate #14 through #3 wire. A ground terminal is also provided for grounding the secondary circuit at the transformer.

Junction box
The junction box has a 1" conduit hub on either end and a knock out for a 1" conduit fitting on the bottom. The box is anchored to the body of the transformer with screws and can be easily detached, simplifying installation and change-out procedures.

Baseplate
The base is constructed of corrosion-resistant aluminum and is secured to the encapsulated base support.

Mounting
The VOZ-11G and VOY-11G can be mounted in upright or cantilever positions. Stress relief devices should be used to support cable connections.

Test reports
Test reports are stored electronically and can be e-mailed in various formats at the time of shipment.

Standards
This unit meets or exceeds all requirements of IEEE C57.13-2016 and can be tested to other standards as requested.
