# CBT-3T6-5R Firmware 9.0.1

Products Affected: **CBT-3T6-5R**

## Summary

The initial release of **CBT** firmware v9.0.0 under some circumstances caused a reboot loop problem on the CBT-3T6-5R. Firmware v9.0.1 resolves this issue.

## Background

Manual upgrades to **CBT-3T6-5R** over BACnet were reported to cause a serious error if the Strategy was not wiped before upgrade.

## Features

Updated firmware version is being made available for **CBT-3T6-5R**.

**Note**:   **CBT12iVAV** and **CBT-4T4-4T** controllers do **not** support the FusionAir Smart Sensor range.
Users should not upgrade these controllers to firmware version 9 or later.

## Customer Impact

Customers who had downloaded **CBT** Firmware v9.0.0 **must NOT** install it on **CBT-3T6-5R.**

Upgrade directly to v9.0.1 if support for FusionAir Smart Sensors is required.

The firmware can be download from our support web sites:

• North America  https://cyloncommunity.com/

• Europe/ROW see http://support.cylon.com/
