

MEDIUM VOLTAGE PRODUCT

# TJP 5.4

## Indoor voltage transformers

Parameters	Units
Highest voltage for equipment	12 - 17.5 kV
Power frequency test voltage, 1 min.	28 - 38 kV
Lightning impulse test voltage	75 - 95 kV
Fuses	2 or 6.3 (IEC) A
Max. rated burden, classes	50/0.2 -100/0.5 -200/1 VA/cl
Residual winding	50 - 200/6P VA/cl

### Description

The TJP 5.4 epoxy insulated voltage transformers are cast in epoxy resin and designed mostly for insulation voltages of 12 kV to 17.5 kV.

If no a different value is required the transformers are manufactured with a overvoltage factor of  $1.9 \times U_n/8$  hrs. One outlet of the primary winding, including the respective terminal is insulated from the earth to a level which corresponds to the rated insulation value. The other outlet of primary winding with its terminal is earthed during the operation. Most of the transformers are equipped with two secondary windings, the first one for either measuring or protection purposes, the other for being connected into an open-delta connection in a threephase system. One terminal of each secondary winding and one of the open-delta connected terminals have to be earthed during the transformer operation.

The secondary windings are lead out into a cast-type secondary terminal board. The secondary terminal board is covered with a sealed plastic cover.

The transformer can be mounted in any position. The transformer body is fixed by four screws.

The TJP 5.4 transformer is equipped with a fuse conformably to IEC standard. The design of TJP 5.4 is suitable for ABB AIS panels (see HV terminal and the position of the secondary terminals).

### Rated primary voltages

10/ $\sqrt{3}$  kV; 11/ $\sqrt{3}$  kV; 13.8/ $\sqrt{3}$  kV; 15/ $\sqrt{3}$  kV

Other primary voltages can also be supplied on request.

### Rated secondary voltages

100/ $\sqrt{3}$  V; 110/ $\sqrt{3}$  V – accuracy classes 0.2; 0.5; 1 (measuring winding) or 3P; 6P (protection winding). Other secondary voltages can also be supplied on request.

### Rated voltages for open-delta connection

100/3 V; 110/3 V - class 6P. Other voltages for open-delta connection can also be supplied based on customer requirement.

### Rated frequency

50 Hz; 60 Hz.

Based on a discussion with the manufacturer the transformer can also be designed for two primary voltage levels (with change over secondary side).

The transformers are manufactured conformably to the requirements and recommendations of the following standards and regulations: IEC, VDE, ANSI, BS, GOST and CSN.

# Dimensional Drawing

## TJP 5.4

Weight: 41 kg  
Creepage Distance: 453 mm

fuse IEC 60282-1
