

PRODUCT HIGHLIGHTS

Ty-Rap® high-performance cable ties

Engineered to last.

Ty-Rap

Since 1958, Ty-Rap high-performance cable ties have set the industry standard for strength, reliability and longer life in demanding conditions.

Key differentiating features

- The Grip of Steel® stainless steel locking device is embedded deeply into the cable tie head to ensure maximum strength and proper tension every time.
- Solid, notchless body ensures more precise tightening and eliminates the stress concentration points that can lead to failure.
- Ribbed and stippled body grips the cable bundle and prevents slippage after installation.
- Nylon 6.6 material offers high strength in a wide range of temperatures. Nylon 12 weather-resistant, UV-resistant fluoropolymer and flame-retardant options are also available.
- Ty-Rap cable ties, easily identified by their Original Oval™ head, were the first cable tie invented and have since been used in professional race cars and in outer space, in addition to demanding industrial applications all over the Earth.
