

# SELE1000 – THYRISTOR BRIDGES

## Current life cycle status

The SELE1000 – THYRISTOR BRIDGES are in the Obsolete phase since 1.1.2015 according to the ABB life cycle model outlined above.

## Life cycle plan

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

## Further information

For more information on drives life cycle management and available services contact your local ABB organization or at [www.abb.com/drives](http://www.abb.com/drives).

## Support availability in Obsolete phase

In the Obsolete phase migration to the active product generation is the only possibility.
