Current life cycle status
The SELE1000 – THYRISTOR BRIDGES are in the Obsolete phase since 1.1.2015 according to the ABB life cycle model outlined above.

Life cycle plan
The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Support availability in Obsolete phase
In the Obsolete phase migration to the active product generation is the only possibility.

Further information
For more information on drives life cycle management and available services contact your local ABB organization or at www.abb.com/drives.
