

# ABB EcoSolutions™ – Emax to Emax2 Retrofit

**Direct replacement retrofit for low-voltage Emax circuit breakers** is designed to extend the lifespan of electrical system with retrofit solutions requiring minimal modifications to the existing switchgears. The Direct Replacement retrofit kits enable fast, reliable upgrades from old Emax and New Emax circuit breakers and switch disconnectors to Emax2. Enhance your system with improved safety features, continuous reliability and advanced digital connectivity capabilities.

**Eco**  
Solutions™

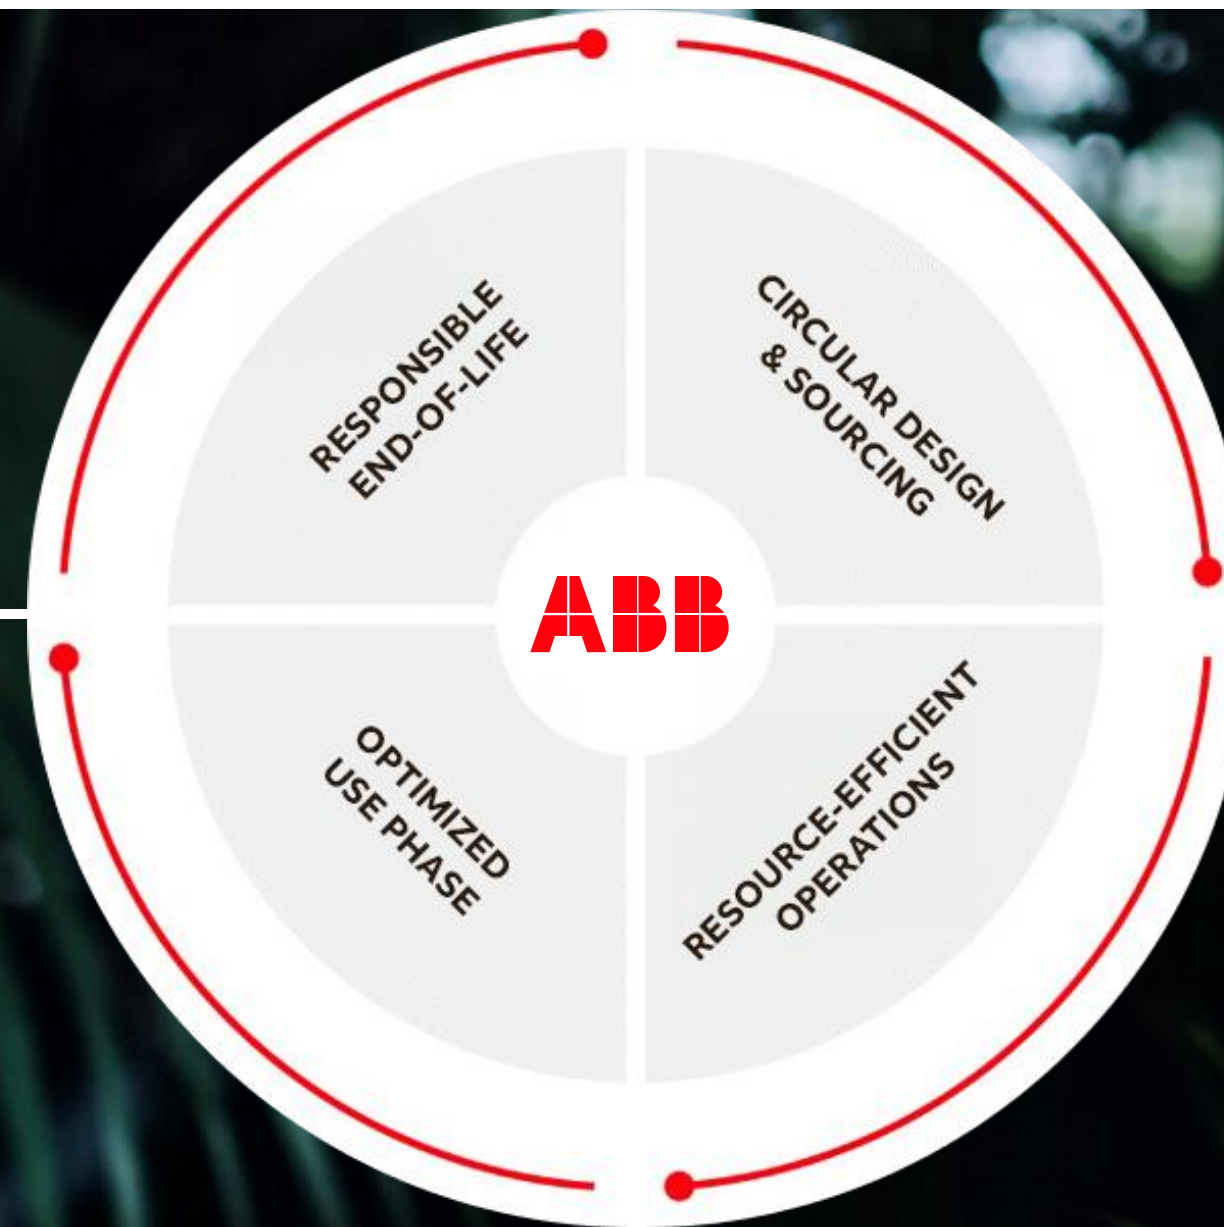

## End-of-life instructions

Closing the life-cycle loop with recycling instructions embedded in circular design.

## Lifetime extension services offered

Modular design makes repairs easier and more efficient, helping extend the service life of the existing switchgear.

## Designed for recyclability at end of life

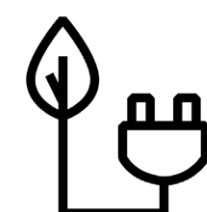

Up to **80% recyclability rate**, calculated according to EN 45555.

## Operations

Produced at a facility with a landfill diversion rate of 100%, affirming our commitment to zero waste practices.

**Third-party verified Environmental Product Declaration**  
EPDs compliant with ISO 14025 Type III (externally verified) ensure data accuracy and full transparency on the product's environmental impacts throughout its life cycle. ([EPD Link](#))

## Low carbon manufacturing

This product is manufactured in an ABB facility that is powered by renewable energy.
