

# ABB's Smart Squad - Wednesday, April 16, 2014

## Who's on tap at the Smart Bar (Booth #6725)

### Krzysztof Kulasek

Vice President of Engineering, Large and Medium Power Transformers

**On tap: Wednesday, 10:15 AM**

With more than 20 years of experience in transformers, Kulasek has been involved in all aspects of new technology implementations with expertise in transformer optimization, insulation design, seismic calculations and stray loss heating.

### Ulf Andersson

Director of Engineering, Power Systems - Substations

**On tap: Wednesday, 3:15 PM**

Andersson's areas of expertise include: optimal substation and switchyard design with AIS, GIS and/or hybrid solutions, as well as composite plant solutions, including the coordination of AC switchyard solutions with HVDC, SVC, and StatCom.

### Rodney Durban

Head of Clean Air Initiative, North America

**On tap: Wednesday, 11:15 AM**

With 20 years experience in the electric utility business, Durban has led a cross divisional strategic marketing initiative that focuses on changing EPA regulations and reduction in coal power generation.

### John Boggess

Principle Project Engineer - Substations

**On tap: Wednesday, 3:15 PM**

Boggess' areas of expertise include: project engineering, project management, engineering management and business development for air insulated (AIS), gas insulated (GIS), and HVDC substations.

### Steve Kunsman

Vice President, Power Systems - Substation Automation products

**On tap: Wednesday, 12:15 PM**

With 30 years of experience, Kunsman's areas of expertise include: substation automation, protection and control applications and products, communication technologies, and cyber security.

### Gary Rackliffe

Vice President, Smart Grids, North America

**On tap: Wednesday, 4:15 PM**

With over 30 years of T&D experience working for ABB, Rackliffe's responsibilities include business development and driving product strategy for ABB's Smart Grid business. Rackliffe's areas of expertise include smart grids and IT/OT convergence.

### Brad Luyster

Director, Microgrids North America

**On tap: Wednesday, 1:15 PM**

Luyster's business experience spans across a diverse range of industries from basic electrical components, industrial automation and control, as well as the utility and power industry, where Luyster specializes in ABB's Microgrid business.

### Howard Self

Program Manager, Smart Grid Distribution Automation

**On tap: Wednesday, 4:15 PM**

Self is responsible for ABB's Smart Grid Center of Excellence and Distribution Automation Verification Center. Self's areas of expertise include smart grid, Volt/VAR optimization, and Fault Detection Isolation & Restoration (FDIR).

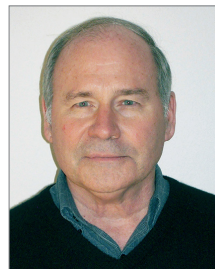

### Adam Guglielmo

Director, Business Development opos

**On tap: Wednesday, 2:15 PM**

Guglielmo has over fifteen years experience in the telecommunication industry and has worked in various roles such as product management, sales engineering and business development. His areas of expertise includes wireless communications and mesh networks.

### Ray Catlett

Senior Technical Consultant

**On tap: Wednesday, 5:15 PM**

Catlett's areas of expertise include: electrical power design, technical support and system analysis for petrochemical plants, offshore platforms, power plants, data centers, power utilities, and pulp and paper.
