COURSE DESCRIPTION

G741 ACS5000
Service & Commissioning

Course goal
The goal of this course is to introduce the ACS5000 Variable Frequency Drive to the field service engineers and to teach them in a safe and instructive environment the correct procedures and techniques required for commissioning, servicing and maintaining this drive.

Main learning objectives
Upon completion of this course, the participants will be able to:

- Understand the drive system topology
- Carry out basic commissioning, service and maintenance work as well as fault-tracing
- Verify and modify drive parameters
- Locate and replace faulty hardware components
- Using MV Drive Portal database to update the knowledge of the drive, get familiar with spare parts and warranty issues handling
- Start the certification program for commissioning; after completion of the certification program the participants are allowed to commission the medium voltage drive system

Participant profile
Commissioning, field service, testing and maintenance personnel of ABB or certified technical partners.

Prerequisites
- Good engineering knowledge of AC drives and motors
- Personal computer knowledge
- Laptop with DriveDebug and DriveWindow loaded, fiber optic programming tool (RUSB-02)
- Successful completion of course G741e

E-learning course topics (G741e)

Generalities
- ABB medium voltage drives family overview
- Five-level inverter topology, DTC control
- Options and typical applications

Control Hardware description (power electronics & control)
- Main circuit diagrams
- Component and PCB functions

Water cooled system
- Main circuit diagrams
- Component and PCB functions

Protection concept
- Fault classes
- Protective reactions

Classroom course topics
Generalities
- MV data base instruction
- Software compatibility and downloading sequence
- How to use commissioning tools
- How to give a short customer training after commissioning

Demonstration drives
- Component recognition and location
- Starting/stopping procedures
- Motor runs and tuning

Drive commissioning
- Cold and hot commissioning procedure
- Calculation of motor parameters

**Software description**
- Software structure, parameter’s description
- Fieldbus programming (interfacing with overriding system)
- Setting and tuning motor control parameters

**Fault-tracing and troubleshooting**
- Alarm and fault indications
- Measuring and replacing power components.

**Methods**
- E-learning, internet based course
- Lectures and demonstrations

### Course outline

<table>
<thead>
<tr>
<th>DAY 1</th>
<th>DAY 2</th>
<th>DAY 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>— MV database instruction</td>
<td>— Cold Commissioning procedure with Drivestartup</td>
<td>— AD motor model calculation</td>
</tr>
<tr>
<td>— Review of e-learning</td>
<td>— SW downloading</td>
<td>— First start the AD motor</td>
</tr>
<tr>
<td>— Component recognition and location</td>
<td>— First energizing the converter</td>
<td>— AD motor model revising and optimization</td>
</tr>
<tr>
<td>— Drive system specifications</td>
<td>— Semiconductor checking and replacing</td>
<td>— Switching frequency turning</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>DAY 4</th>
<th>DAY 5</th>
</tr>
</thead>
<tbody>
<tr>
<td>— SD motor model calculation</td>
<td>— Common troubleshooting during commissioning</td>
</tr>
<tr>
<td>— EXU current controller turning</td>
<td>— Preventive maintenance</td>
</tr>
<tr>
<td>— Position Encoder calibration</td>
<td>— Troubleshooting procedure and exercises</td>
</tr>
<tr>
<td>— SD motor model revising and optimization</td>
<td>— Reporting</td>
</tr>
</tbody>
</table>

- Practical exercises with training equipment

**Follow-up training**
- ACS5000 Expert Days

**Duration**
- Ca. 2 days e-learning
- 5 days classroom training
- Max. 8 participants

**To register:**
Please apply online (signup required):
ABB MyLearning/G741
Additional course dates are available on request.
Please note: The course is only carried out if at least 4 participants have been booked.
