

Course description

G795

DriveMonitor™

Service and Commissioning

Course goal

The goal of this course is to train the participants in the operation, configuration, remote connection and troubleshooting of DriveMonitor™.

Through various training methods the students will develop their knowledge, confidence and skills in the handling of this monitoring system.

Learning objectives

Upon completion of this course the participants will be able to:

- Access and use DriveMonitor™
- Install and troubleshoot the system
- Set-up DriveMonitor™ for operational use
- Remotely connect to DriveMonitor™ via an internet connection
- Export data and generate automatic reports

Participants

This training is targeted to commissioning and service engineers of ABB and technical partners.

Prerequisites

- Basic knowledge of ABB MV drives (recommended to attend a drive training first)
- Laptop

Topics

- Overview
- Hardware description
- User interface
- Installation and start-up
- Remote connection
- Maintenance
- Troubleshooting
- Practical exercises

Methods

This is an instructor led course with lectures and demonstrations
Practical exercises with training equipment

Duration

2 days
Max. 8 participants
