

HARDWARE UPGRADE

Reference No: 864J002-1 rev. B

Description: Model 3100 Series LCD Retrofit Kit

ABB product data indicates ABB PGC 3100 Series Process Gas Chromatographs are currently utilized in your process.

Note: The model 3100 LCD Retrofit Kit replaces the existing Cathode Ray Tube (CRT) display with modern LCD front panel electronics. This upgrade enhances the visual quality of the display, while increasing the life-span and creating a common spare part for models of gas chromatographs. The upgrade maintains the current analyzer functionality.

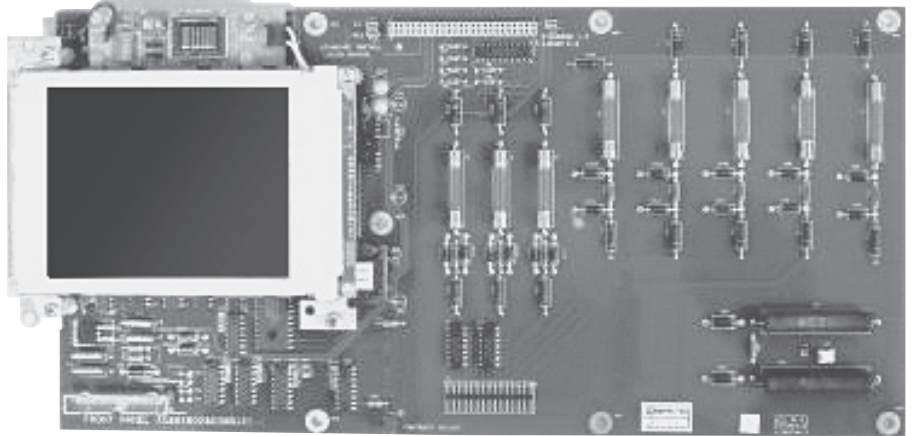

ABB Service is recommended to replace the CRT. This will ensure minimum downtime and continued reliable operation of this analyzer.
