

# 5 NordLink

Record-breaking facts

1

**The highest power capacity**

of any HVDC VSC bi-pole cable interconnection  
**1,400 megawatts (MW)**

2

**The highest voltage level**

ever attained in a HVDC VSC cable interconnection  
**525 kilovolts (kV)**

3

**The first HVDC connection**

between Norway and Germany

4

**623 kilometers (km)**  
**The world's longest international**

HVDC VSC cable interconnector

5

**Europe's longest**

HVDC power grid interconnection

## POWERING GOOD FOR A SUSTAINABLE FUTURE

NordLink HVDC interconnector is nearly doubling the power transmission capacity compared with earlier systems and improves overall reliability and availability in the grid. The result is NordLink will be able to deliver large amounts of sustainable, affordable power in both directions.
