The time synch setting is accessible through PCM600, Web HMI and the local HMI. This document will detail how to get the setting for all three sources.

**Via PCM600**

1. Go through the following path under the target RER620: IED Configuration/Configuration
2. Right click on **Time:** 0 and click **Parameter Settings:**

3. Select the desired time synch source (all other sources will be ignored; true for all 3 entry methods):

4. After the selection has been made, write the settings to the IED.

**Via Local HMI**

1. Go through the following path via the Local HMI: Configuration/Time/Synchronization
2. Make sure “Synch source” is highlighted, and press the Enter button.
3. Use the Up/Down Arrow buttons to select the source, press the Enter button:

4. Press the Menu button and confirm the setting change when prompted.

**Via Web HMI**

1. Go through the following path in Web HMI: Configuration/Time and click *Synchronization*:

2. On the right side of the screen, click **Enable Write** and select the desired "Synch source":

3. Once all selections are made, write the settings to the IED.
