

## Z470

# Aztec 600 Colorimetric Level 1 Service Training

ABB Measurement & Analytics training facility at the Stonehouse site delivers a programme of Instrumentation and Analyser training courses, specifically designed to meet client's needs.

The skills of operations and maintenance play a key role in equipment performance as well as maximising investment.

### Course type and methods

This is an instructor led workshop with presentations and demonstrations, extended practical sessions.

### Participant profile

The course is designed for operators and technicians who are responsible for the assessment of treatment performance in the field.

### Course objectives

On completion of the training, students will have been trained to use the ABB Aztec 600 Color Analyzer.

### Duration

One day training course.  
Classroom or remote delivery available

### Course outline

- Introduction to the Aztec 600 range
- Where and Why do we measure
- Principle of Measurement
- Theory of Operation
- Calibrations
- Installation and Commissioning Requirements
- Service and maintenance
- Troubleshooting
