

# ABB Care Contract Loyalty Offer

## Field Information Manager – Device management made easy

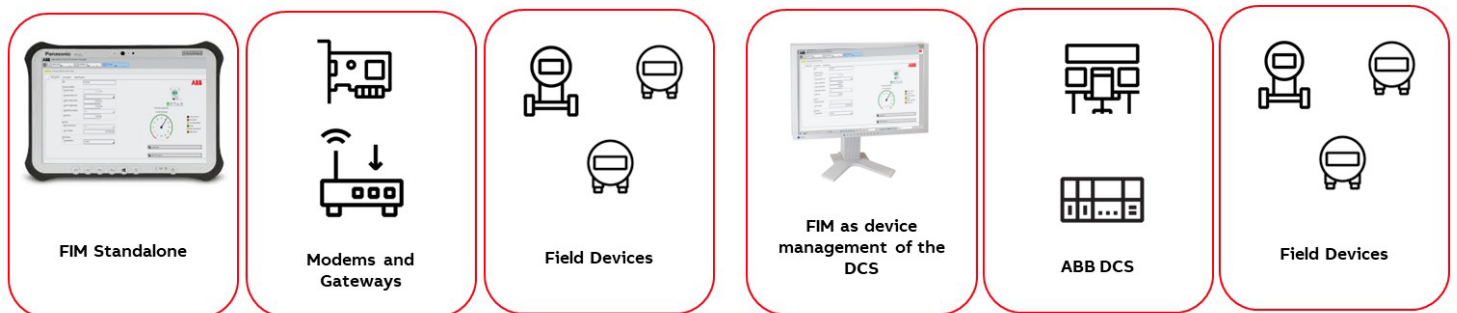

The ABB Ability™ Field Information Manager (FIM) is a device management tool that makes the configuration, commissioning, diagnostic inspection and maintenance of instrumentation easier and quicker than ever before. It is the first device management tool that employs FDI (Field Device Integration) technology and it can be quickly installed on PC, laptop or tablet. Start managing your devices in only 3 minutes using the flexibility of FDI technology.

The latest release of ABB Ability™ Field Information Manager 3.1, includes large system support with extended number of supported device tags, and now with more flexibility in **client/server deployment**, additional field connectivity and strengthened Ethernet-APL support. This release also includes usability enhancements when working with device packages and trend views.

### Standalone or Integrated to ABB's DCS - use it as you prefer

#### Standalone

FIM as standalone may access the data of the field devices through different Modems and Gateways.

#### Integrated to ABB's DCS

FIM can connect to the ABB DCS System and retrieve the hardware topology. It is able to route data through the ABB controller and interface with the Field devices which are connected to the respective IO channels. Supports HART, PROFIBUS and PROFINET.

## Easy Installation

- **Quick to start** – installs on Windows servers, workstations and tablets
- Install FIM client where needed
- Multiple users with varying user rights can be configured with different user rights
- Normally, the installation will complete in less than 3 minutes.

Engineering/Maintenance Station

Field Tablet

Cabinet Panel

Any Microsoft Windows 10 device
