

ABB Motion Take-Back and Recycling

Your old motors and drives are worth more than you think

ABB Take-Back and Recycling helps customers managing their old motors and drives. The offering targets customers who need support achieving their sustainability goals and want seamless and responsible recycling from their supplier.

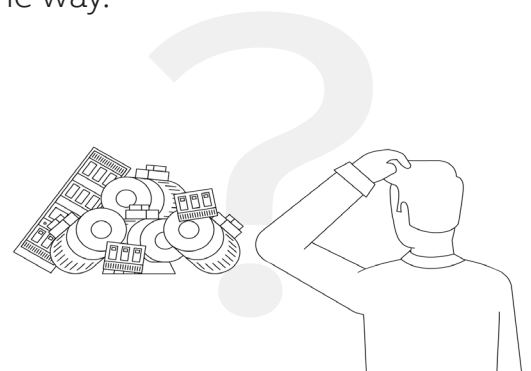

Get the most out of your equipment

ABB Take-Back and Recycling helps customers manage their old motors and drives. This offering targets customers who need support in achieving their sustainability goals and want hassle-free, responsible recycling from their supplier. With Take-Back, we reintroduce raw materials back into circulation. Combined with an upgrade to high energy efficiency motors and drives, we help reduce the environmental impact of your operations, contributing to your sustainability goals.

With ABB Motion Take-Back and Recycling, you can seamlessly turn your old motors and drives into ABB voucher credit. Maximize the value of your end-of-life assets when modernizing, upgrading energy efficiency, or renewing service agreements.

- Proper management of the end of life of your equipment is a challenge often overlooked and underestimated in its complexity.
- Where and how to recycle is usually an afterthought and organized in an ad-hoc manner, often overlooking the true value of the scrap resources.
- ABB Motion works with professional recycling companies to support you with the end-of-life management of your equipment.

We are your trusted partner for take-back, repairs, replacements, and recycling, ensuring a seamless and reliable service every step of the way.

Seamless access to responsible recycling

Customers do not have to deal with the burden of managing end-of-life product disposal, and are assured the products will be managed in a responsible and environmentally sound way. With state-of-the-art recycling and global availability, the customer gains more resource-efficient processes and practices.

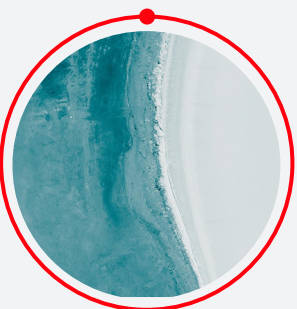

Get the most value out of your old equipment

Convert your own material into higher efficiency solutions and savings of time and effort. Within indirect earnings comes also improved brand value. In some countries ABB voucher credit is available.

Solve circular compliance challenges

Regulatory incentives already in place in key markets and coming more and more in other geographies. With our solution we support the customer in being compliant with the relevant regulations by means of holistic circular solutions: responsible end of life (including certificate) and commercial incentives for higher efficiency solutions. With our best-practices in other markets we can support the customers in navigating the regulatory complexity.

Preserve resources

Take-back programs allow for optimal recycling of materials that results in a positive contribution to the environment. Contribute to a circular economy by eliminating waste and keeping products and materials in use.
