Course description

T315D
System 800xA with AC 800M
Engineering, Part 1 – Diagrams

Course goal

The goal of this course is to learn the engineering of a complete control project using the Extended Automation System 800xA with AC 800M controllers and Diagrams as the engineering tool. Note that this course is split in two parts and the follow-up course is T315H for the Human System Interface (HSI) configuration.

Learning objectives

Upon completion of this course, the participants will be able to:
- Explain the System 800xA architecture and the function of the different components
- Navigate in the system and create new objects / aspects
- Create a new control project and plan the structure of application programs based on a P&ID and a Functional Specification
- Configure the AC 800M hardware and corresponding I/O’s
- Handle the standard libraries provided by ABB and develop project specific libraries
- Design and configure application programs by using a variety of IEC 61131-3 languages
- Define tasks and describe the assignment rules
- Analyze the controller diagnostics and optimize the CPU load / memory usage
- Configure user defined object types
- Setup communication using various protocols
- Setup the OPC connectivity to AC800M

Participant profile

This training is targeted to system and application engineers, commissioning and maintenance personnel, service engineers and system integrators.

Prerequisites

Students shall know the fundamentals of working with Control Systems and have basic knowledge of Windows 7 and networking technologies.

Topics

- System 800xA architecture
- Engineering Workplace / Plant Explorer
- Project Framework
- AC 800M hardware
- Libraries
- Variables and data types
- Diagrams - FBD and CMD
- Diagrams - Structured Text
- Task assignment and Memory
- Diagrams – Sequential Function Charts
- Diagrams - User defined object types
- Communication
- OPC connectivity
- Project backup and ACM

Course type and methods

This is an instructor led course with interactive classroom discussions and associated lab exercises. Approximately 50% of the course is hands-on lab activities.

Course duration

The duration is 5 days.
Course description

T315D
System 800xA with AC 800M
Engineering, Part 1 – Diagrams

Course outline

Day 1
- Course overview
- System 800xA architecture
- Engineering Workplace / Plant Explorer
- Project Framework

Day 2
- AC 800M hardware
- Libraries
- Variables and data types

Day 3
- Diagrams FBD and CMD
- Diagrams Structured Text

Day 4
- Task assignment and memory
- Diagrams – Sequential Function Charts
- Diagrams - User defined object types

Day 5
- Communication
- OPC connectivity
- Project backup and ACM
