RMD_{fsd} \hspace{1cm} \text{Cost effective solution for projects with very constant ore grade throughout life cycle of the mine or for small ball mills that do not require variable speed.}

RMD_{vsd} \hspace{1cm} \text{Variable speed solution, including softstarting and optimum torque control for entire speed range. Suitable for any kind of grinding mill.}

RMD_{plus} \hspace{1cm} \text{Full variable speed solution, additionally including mill application features providing highest operational flexibility and optimizing maintenance actions.}

SmartMill \hspace{1cm} \text{Combines all features from RMD_{plus} with the advanced process control, providing the ultimate control strategy. Ideal to increase productivity and energy efficiency.}

fsd: fixed speed drive, vsd: variable speed drive
