

Dear Customer,

With reference to the EU Directive 2002/95/EC on Restriction of Hazardous Substances (RoHS), amended by the Commission

Decision of 18 August 2005, 2005/618/EC,

Decision of 13 October 2005, 2005/717/EC,

Decision of 21 October 2005, 2005/747/EC,

the position of **ABB SACE SpA BU Instrumentation** is hereafter stated:

Notwithstanding that the RoHS Directive does not apply to **2600T Series Pressure Transmitters** as they are not falling under the categories 1, 2, 3, 4, 5, 6, 7 and 10 set out in Annex IA of the WEEE Directive 2002/96/EC.

But considering that the **2600T Series Pressure Transmitters** can be part of another type of equipment that does fall within the scope of this Directive, the **2600T Series Pressure Transmitters** will be analyzed to identify the uses of the substances subject to restriction according to the RoHS Directive.

Specific projects are running to assess the components and to find, test and validate alternative RoHS-compliant solutions if necessary.

After the assessment, we can provide information about the results of the RoHS-compliance assessment of the **2600T Series Pressure Transmitters**.

Sesto San Giovanni, 2005 November

Aurelio Fanoni

Vice President

BU Instrumentation
