
COURSE DESCRIPTION

CHH625 – GMD Ring Motor Operation and Maintenance (Practical and Theoretical)

Course goal

The goal of this course is to understand all aspects of a ring motor. Participants will learn about the installation, maintenance and manufacturing of a ring motor within the gearless mill drive (GMD) system. The course contributes effectively to the participants' knowledge regarding the ring motor in general, maintenance preparation, availability of spare parts and handling of emergency cases.

Main learning objectives

The participants will be able to:

- Name the main parts of a ring motor
- Understand how the ring motor is manufactured
- Recognize the different types of ring motors
- Understand the installation steps of a ring motor
- Prepare maintenance inspections for planned shutdown inspection on the ring motor
- Understand the structure of the operation and maintenance manual (OMM)
- Handle spare parts and store them correctly
- Proceed correctly in emergency cases such as unexpected shutdown of the ring motor

Participant profile

This training is targeted to skilled mechanical maintenance personnel and service engineers.

Prerequisites

Participants should have knowledge of the GMD system and the ring motor. Basic knowledge or experience in mechanical or electrical work is a plus.

Topics

- Ring motor overview
- Ring motor manufacturing
- New installation of a ring motor
- Operation and maintenance manuals (OMM) of the ring motor
- Preparation of the workplace for maintenance of a ring motor
- Knowing all required spare parts, tools and consumables related to operation, maintenance or emergency case of the ring motor

Course type and methods

This is an instructor-led course with presentations and interactive classroom discussions. Besides that, a walk through the factory with practical and technical explanations/exercises will take place during the training.

Duration

The duration is 5 days.

Remarks

Note: This course does not certify, approve, authorize, accredit or validate any technician/engineer to perform any maintenance/repair work without ABB's written approval.

This course can only be delivered at ABB's training facilities in Bilbao, Spain.
