

For detection of smoke with the optical principle (scattered light effect). The device requires an external power supply. A detector base is also necessary, e.g., B412NL.

- flat design (low profile)
- alarm triggering display with 360° view
- supply and evaluation in four-wire network
- functional test with test magnet

Technical Data

Power supply	12 VDC
Nominal current consumption	120 µA
Dimensions (Ø x H)	127 x 48 mm (in base B412NL)
