

65 YEARS ANNIVERSARY TY-RAP® CABLE TIES

Nearly 30 billion cable ties installed and counting

For 65 years, Ty-Rap® cable ties helps make the world a safer place

Ty-Rap®

Ty-Rap high performance cable ties are the right choice when performance really matters.

Self-fastening and almost indestructible, nearly 30 billion standard and high-performance Ty-Rap cable ties have been produced. If laid end-to-end, they would stretch from Earth to the moon and back again more than a dozen times.

With its first patent submitted in

1958

Ty-Rap cable ties are a benchmark of excellence and innovation in wire management

First developed to solve the problem of bundling the hundreds of feet of wiring found inside commercial aircraft, Ty-Rap cable ties can now be found virtually everywhere – from Nascar racing engines to backyard tool sheds and the Mars Rover. Ty-Rap cable ties from ABB pass tough tests by being created through innovation with high quality standards.

With its first patent submitted in 1958 as a way to bundle wiring in airplanes, the Ty-Rap® cable tie brand remains a benchmark of excellence and innovation in wire management.

Engineered for high-performance, Ty-Rap® cable ties are available in standard nylon or in materials that are specially formulated to withstand the most adverse conditions, from UV exposure to extreme cold or heat. They have even been designed to withstand the rigors of space.

When strength, aesthetics, reliability and performance are required, knowledgeable professionals turn to the original and trusted source for cable ties and accessories. Ty-Rap fastening systems include a full range of cable ties, identification ties, clamps, mounting bases, harnessing aids and installing tools.

Using Ty-Rap fastening systems for any bundle application will improve the reliability of the installation, effectively reducing the total cost of ownership. Ty-Rap's carefully designed features will also speed installation and provide a high level of precision, safety and comfort.

Engineers, installers, panel builders and other professionals rely on Ty-Rap cable ties to bind,

bundle and manage cables. The cable ties are quick and easy to install where the low profile head and oval shape facilitate pulling cable bundles through openings. Due to their patented design, ABB's Ty-Rap cable ties have a long service life. In addition, their firm grip prevents the tie from shifting in the event of vibrations.

For 65 years: Ty-Rap cable ties, are the right choice when performance really matters.
