ABB E-mobility - The home of charging

Terra Home

Did you know that 90% of drivers want to act more sustainably in 2023*

And, 54% of drivers told us that they would be more likely to make the switch to an EV if the electricity were renewably generated*  

Introducing Terra Home, which automatically prioritizes electricity from renewable sources and powers your EV with sustainable energy 

What does this mean? It enables you to make the best possible use of your renewable energy sources and further reduce your carbon footprint 

Charge different

* Global study commissioned by ABB E-mobility comprised 5,500 drivers from across the following markets: Austria, Canada, France, Germany, Italy, Netherlands, Spain, Switzerland, UK, US
