Sensi+™, fast and accurate monitoring of H$_2$S, H$_2$O and CO$_2$. Assures a safe and reliable natural gas network with a single device.

Sensi+, ABB’s innovative ICOS laser technology, answers multitasking issues by accurately monitoring H$_2$S, H$_2$O and CO$_2$ contaminants in natural gas streams in real time. The fast response in seconds allows swift action to manage any threat by redirecting contaminated streams that could compromise safety and operational yield value. Sensi+ eliminates work duplication by managing a single asset and enabling your workforce to generate more value. [abb.com/analytical](http://abb.com/analytical)
