

Protection and control REX640

All-in-one protection for any power distribution application

Innovative design

- Complete application coverage with one device for optimal flexibility and cost-effectiveness
- Ready-made application packages for maximum convenience and flexibility
- Designed to support the increasing digitalization of substations

Cyber security at the fore

- Supervised services, protocols and communication ports
- Role-based access control for individual users
- Centralized management of individual user accounts and roles
- Chronological audit trail including security related events

Future-proof and flexible

- Modular and scalable hardware and software for maximum flexibility for the lifetime of the relay
- Freedom of customization and easy adaptation to changing protection requirements
- Continuous access to the latest software and hardware developments

Optimal usability

- Increased situational awareness and optimal usability with application-driven local HMI (LHMI)
- Ability to cover up to 20 REX640 relays with one switchgear HMI (SHMI) for optimal visibility and 15% savings in relay costs
- Ready-made application-based LHMI pages – saving both time and efforts
