Current life cycle status
The majority of the Control Panel family CP400 is in the Classic life cycle phase since 01.01.2013 according to the ABB life cycle model outlined above. Exceptions are:

Active phase:
- CP415M
- CP430B

Limited phase:
- CP430BP
- CP430BP-ETH
- CP430C
- CP430C-ETH
- CP435T
- CP435T-ETH
- CP440C-ETH

Life cycle plan
It is planned to keep the majority of CP400 Control Panels in the Classic phase until the end of 2015, after which it will be transferred to Limited phase.

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Recommended actions
It is recommended to use CP600 Control Panel family for extensions and new installations.
