COURSE DESCRIPTION

MV ACS Drives Expert Days
Classroom training in Turgi, Switzerland

Learning objectives
- Advanced system and application know-how
- Analysis of field cases and improvement of troubleshooting skills
- Exchange of experience within global service community and site feedback collection
- Strengthen the network between field service engineers and the MVD Center of Excellence (technical support, product managers, quality team, R&D, etc.)

Learning content for the following products:
MV ACS Drives with AMC & BCON/UCON control platform divided in two courses:

General Purpose MV ACS Drives Expert Days:
ACS1000, ACS2000, ACS5000 Air cooled

Special Purpose MV ACS Drives Expert Days:
ACS5000 Water cooled, ACS6000 and ACS6080

For the certification of a specific product, it is necessary to attend the whole course, either the General Purpose Drives Expert Days, Special Purpose Drives Expert days or the combination of both.

Methods
High focus on hands-on exercises, case study workshops, interactive expert talks, Q&A sessions, etc.

Participant profile
Field service engineers and other technical personnel working with MV ACS Drives.

Pre-conditions
- Expert certificate of the corresponding product(s) or Basic certified personnel who want to achieve the corresponding Expert level
- Completed MV Drives Expert Session within the last 6 months

(Re-)Certification concept
To keep the Expert certification, it is required to attend the face-to-face Expert Days every 3 years. In addition, the yearly attendance of the Expert Session is required.

Location
ABB Switzerland Ltd.
Learning Center MV Drives
Austrasse
CH-5300 Turgi / Switzerland

Please bring your service laptop with the installed drive tools.

Due to the limitation of the seats we recommend to enroll in the training as early as possible. The deadline for registration is 10 days before the Expert Days start.

**Didn't find a seat in 2022?**

We are aware that the demand for Expert Days is high now after two years with Covid restrictions. Nevertheless, the number of seats is limited due to the following reasons:

- We want to ensure a high-quality classroom training with focus on hands-on exercises, case study workshops, interactive expert talks, Q&A sessions, etc.
- We want to avoid that everyone needs to attend Expert Days in the same year in the future.

In case you did not manage to enroll for your preferred session, we kindly ask you to enroll for the waitlist class in MyLearning (links: [G707](#), [G727](#), [G767](#)). We will inform you as soon as the dates for 2023 are defined.

If one or more of your certificates is expiring before, please contact us: [ch-learningcenter-mvdrives@abb.com](mailto:ch-learningcenter-mvdrives@abb.com)

In any case, don't miss the virtual **Expert Session**. More details about the Expert Training concept can be found [here](#).

**Service & Commissioning training**

Do you need to be trained on other products too? Reduce travel costs by combining Expert Days with a Service & Commissioning training. The full 2022 training calendar can be found [here](#).

Please find [here](#) all our standard courses for Service & Commissioning as well as Operation & Maintenance which are currently bookable in MyLearning.

**COVID-19:** In Switzerland, special rules apply to contain the COVID-19 pandemic. We will conduct the courses in strict compliance with current hygiene and distance regulations. On our [website](#) you can find more details.

If you have any further questions, please do not hesitate to contact us.

We are looking forward to hearing from you!

Best regards from Turgi  
Your MV Drives Training Team
