DATA SHEET

Generator Interlock Kits

for PowerMark Gold™ meter socket load centers

With PowerMark Gold Meter Socket Load Center Generator Interlock Kits, there's no need for a separate generator panel. The kit contains everything needed to make an existing meter socket load center a generator panel. It's quick, it's easy, it saves time and money.

Just install the kit in a new or existing PowerMark Gold meter socket load center. They require that the main breaker is in the OFF position before the branch breaker is back-fed from the generator or vice versa.

All kits come complete with assembled base and interlock plates, interlock label, auxiliary breaker retainer, mounting hardware and instructions.

- Interlock kits convert PowerMark Gold meter socket load centers for use as generator panels
- Interlocks 2- or 4-pole main breaker with a 2-pole back-fed branch breaker
- Kit includes stainless steel interlock device, auxiliary main breaker retainer, assembly hardware, hole drill template, critical circuit identification labels
- UL Listed
- Suitable for use in accordance with Article 702 of the National Electrical Code, ANSI/NFPA 70
