

EXcelerate for ReliaGear® SB switchboard

Choose from thousands of simple to mid-complexity configurations, all with a 100% on-time delivery rate

The EXcelerate program for ReliaGear® SB switchboards uses a configure-to-order approach that easily combines pre-engineered sub-assemblies to build switchboards up to six sections, all while expediting turnaround cycles to streamline your operations.

The result? 2X faster lead times on over 6,000+ preconfigured switchboard options.

EXcelerate for ReliaGear® LV SG low voltage switchgear

Shorter lead times and the
flexibility to customize your
order-to-delivery experience

EXcelerate for ReliaGear® LV SG low voltage switchgear offers preconfigured options and shorter lead times. Standard engineering processes often result in lengthy delivery delays. The EXcelerate program's configure-to-order process gives you the power to choose exactly what you need—when you need it.
