Cyber Security Notification - WannaCry Ransomware, impact on Symphony Plus

Update Date: May 18, 2017

Notice

The information in this document is subject to change without notice, and should not be construed as a commitment by ABB.

ABB provides no warranty, express or implied, including warranties of merchantability and fitness for a particular purpose, for the information contained in this document, and assumes no responsibility for any errors that may appear in this document. In no event shall ABB or any of its suppliers be liable for direct, indirect, special, incidental or consequential damages of any nature or kind arising from the use of this document, or from the use of any hardware or software described in this document, even if ABB or its suppliers have been advised of the possibility of such damages.

This document and parts hereof must not be reproduced or copied without written permission from ABB, and the contents hereof must not be imparted to a third party nor used for any unauthorized purpose.

All rights to registrations and trademarks reside with their respective owners.

Affected Products

The WannaCry Ransomware is exploiting a vulnerability in Microsoft Windows so all installations of Symphony Plus are potentially affected.

Scope of this document

This document is a compliment to the document Cyber Security Notification WannaCry (9AKK106930A9737) which is available under www.abb.com/cybersecurity. Alerts and Notifications, (direct document link).

This document provides additional information specific for Symphony Plus all versions.
Recommended immediate corrective actions for Symphony Plus systems

Install all Microsoft Security Updates and other 3rd party patches as described in the document Security Updates Validation Status for Symphony Plus (2VAA001442) which is provided through Sentinel/Power Generation or Water Care support.

Install all virus definition files and other software updates from McAfee is described in the document Symphony Plus Daily Verification of McAfee Virus Scan Updates (DAT) Validation Status (2VAA007432) which is provided through Sentinel/Power Generation or Water Care support.

Symphony Plus systems which are utilizing the published information and implementing the patches on a timely basis are expected to protected from this vulnerability.

SMB is by default enabled in a Symphony Plus System. There are initial indications that SMB cannot be disabled without impact on system functionality. This document will be updated as more information may become available.

Symphony Plus Operations and Symphony Plus Engineering (see Document ID 2VAA001442 for details on individual components e.g. Composer Harmony, Composer Melody, etc)

- Follow the instructions above
- Install the Microsoft security update MS17-010
- MS17-010 was included in March 2017 release of Security Updates Validation Status - 2VAA001442 and March Patch DVD
- MS17-010 can be installed in many ways including manually or using ABB Products and Services which are available.
- Install the updated virus definition files for McAfee. See Symphony Plus Daily Verification of McAfee Virus Scan Updates (DAT) Validation Status - 2VAA007432
- Subscribe to ABB Alerts and Notifications LINK and ensure current enrollment in ABB Power Generation Care or ABB Water Care to get further updates.

Vulnerability Details
