The tap-changer is shown in pos. 10.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.

Continuous lines show leads included in the tap-changer: Dashed lines show leads belonging to the clips and leads.

Contact arm V is located above contact arm H.

Landingkopfpläner visar i Fig. 10.

Kopplingsschema Fig. 9.
