Did you know?
Design deviation of Non OEM Parts is difficult to detect, even for experts

Case Study – TPL73 Radial Bearing
- Design deviation of this copy is difficult to detect for an expert – and impossible to detect for an amateur
- Lacking operational safety confirmed by failures

If you want to be sure
- ABB supplies 100% genuine parts
- Ask ABB to identify a copy part or a genuine part

⚠️ Use of Non OEM Parts = Is it worth the risk?

This is in fact a copy part

Oil Wedge broken
