ABB Ability™ Data collection for safety management
A user-friendly tool to improve safety, productivity and visibility
Report
Download the Safety App to your smartphone and with a few screen taps, log any safety hazard, take a picture and categorize it.

Solve
The Safety App immediately notifies managers, offering them visibility and enabling them to take the right action.

Analyze
The Safety App is a flexible solution that allows a high level of customization as well as access to data in real time and historical reports. Data visualization also enables trend analysis, leading to a learning culture.

Improve
The Safety App reduces the time employees spend manually reporting hazards and offers management a more complete picture so as to continuously improve safety within their organization.

Benefits of the Safety App
The easy-to-use Safety App demonstrates the commitment of your company to safety without creating additional work for employees. With increased visibility on safety hazards, management can make data-driven decisions and take the right action as well as strengthen the safety culture within the organization - ultimately protecting their most valuable asset: people.
