Course description

INTCV609
COM600 Grid Automation Controller

Course goal
The aim of this course is to familiarize the participants with the configuration concept and methods of the Station Automation COM600 Series. The participants will configure a Station Computer COM600 including Gateway engineering and remote communication between COM600 and SCADA system.

Learning objectives
After this course the participant will be able to:
- Understand the configuration concept and methods of the COM600 Series
- Use the Station Automation Builder (SAB600) Tool
- Create the simple project and connect REF615 to COM600 with IEC 61850
- Handle COM600

Participant profile
System engineers and technical personnel who want to learn engineering of COM600 for Station Automation.

Prerequisites
Participants shall have good knowledge of communication techniques.

Topics
- Introduction to COM600 series
- COM600 Station Automation Builder (SAB600) Tool
- COM600 configuration step by step

Course type and methods
This is an instructor led seminar with class room lectures, demonstrations, application and hands on practice. The language of the course is english.

Course duration
The duration of the course is two days.
