

Course description

DE640

Freelance

Workshop - Update newest version

Course goal

Participants should become familiar with the features of the newest Freelance version.

Learning objectives

Upon completion of this course the participants will be able to:

- Use the new system features for future project planning.
- Optimize existing and planned projects using the communicated tips and tricks.
- Accomplish a project upgrade.

Participant profile

Freelance users who want to learn intensely the news in Freelance.

Prerequisites

The participant has a substantiated state of knowledge of Freelance hardware and software products.

Topics

- The course contents are geared to the features of the newest Freelance version. The course contents will be continuously adapted to the news.

Course type and methods

This is an instructor led course with interactive classroom discussions and associated lab exercises. Approximately 50% of the course is hands-on lab activities. The course covers only the news based on the last Freelance version.

Duration

1 - 2 days, depends on the scale of the news.
