## T&B® Fittings cylinder hub

Designed to provide extra confidence in hygiene-critical applications.

**T&B Fittings**

Watch the video

Made of 316 stainless steel for hygiene and corrosion resistance, the T&B Fittings cylinder hub features an NSF certified seal to cover exposed threads, helping reduce the opportunity for microbes to pool and grow within those threads. The hub is UL Type 4X, IP66 and IP67 listed to withstand harsh washdown environments.

All rounded components encourage water run-off and prevent pooling.

Robust 316 stainless steel construction resists corrosion.

Available in 1/2" to 2" NPT trade sizes.

NSF-approved, FDA-compliant integral TPE conduit seal tested to withstand high-pressure washdown in accordance with IP67 listing. Additionally, covers exposed threads of the conduit to further minimize contamination points.
