## Information Security Policy

### Objectives

Managing and securing information is crucial for ABB's success. To maintain information Confidentiality, Integrity and Availability (CIA), we implement and follow adequate control measures to provide appropriate assurance to our personnel, customers and partners.

We continuously improve our documented Information Security Management System (ISMS) in the context of the company's business activities, risk assessments, and applicable regulations.

### Policy

In accordance with this policy, we ensure in our operations that:

- Information is protected against unauthorized access.
- Confidentiality, Integrity and Availability of information- and business processes will be maintained.
- Information security risks from internal and external threats are managed and reduced.
- Legislative and regulatory requirements and company policies are met.
- Business continuity plans are developed, maintained and assessed.
- A culture of security awareness is promoted through information security training.
- All actual or suspected information security breaches are thoroughly investigated and reported to the affected and relevant parties based on contractual and legal requirements.

### Scope

This Information Security Policy applies across all ABB Oy business units, divisions and locations, covering all employees, contractors, partners, regardless of function, position or role in the company and all systems, data and offerings throughout their lifecycle.

### Declaration of the Management

The Management team of ABB Oy has established this policy. The management team oversees its control areas, that established Information Security Management System is followed and that it fulfills regulatory compliance. The ABB Oy management team shall review this policy periodically.

All business units and function management at ABB Oy are accountable for implementing this policy and ensuring that employees understand their responsibilities and comply with the set Information Security Policy.

Compliance with the Information Security Policy is mandatory.
