1 Information about the IP-Gateway

1.1 General information
Please read through this manual carefully and follow the instructions provided. This will ensure reliable operation and long service life of your product.

For reasons of clarity, this manual does not contain all the detailed information on all the models of the products, nor can it take into consideration all conceivable circumstances related to installation, operation and maintenance.

If additional information is required or problems arise that are not covered in this manual, the necessary information can be requested from the manufacturer.

The product has been constructed according to the latest valid regulations governing technology and is operationally reliable. It has been tested and left the factory in a technically safe and reliable state. To maintain this state for the period of its operation, the specifications of this manual must be observed and adhered to.

Modifications and repairs to the product must only be undertaken if the manual expressly permits this.

It is only the adherence to the safety instructions and all safety and warning symbols in this manual that will ensure the optimum protection of the user and the environment as well as the safe and trouble-free operation of the product.

1.2 Structure of the manual

- This manual provides you with detailed technical information about the device, its installation and configuration. The use of the device is explained by means of examples.
- The chapters "Information on the manual," "Safety," "Environmental information" and "Product overview" contain general specifications and basic information as well as a description of functions.
- Chapters "Technical data" and "Installation and electrical connection" describe the device technology and installation, mounting and electrical connections.
- Chapters "Integrating" and "Configuration" contain instructions on commissioning and setting up or integrating the device.
- Chapter "Maintenance" contains information about cleaning, fault condition diagnostics and repairing the device.
1.3 Symbols in the manual

⚠️ Danger - danger to life
This symbol in connection with the signal word "Danger" indicates dangerous situations that could lead to immediate death or serious injury.

⚠️ Warning - danger to life
This symbol in connection with the signal word "Warning" indicates a dangerous situation that could lead to immediate death or serious injury.

⚠️ Caution - risk of injury
This symbol in connection with the signal word "Caution" indicates a possibly dangerous situation that could lead to slight or moderately serious injury.

⚠️ Attention - damage to property
This symbol indicates a possibly harmful situation. Non-observance of the safety instructions can lead to damage to destruction of the product.

ℹ️ Note …
This symbol indicates information or references to additional useful topics. This is not a signal word for a dangerous situation.

▶️ This symbol refers to integrated videos with additional information on the respective chapter.

Trash Can Icon
This symbol indicates information on the protection of the environment.

Examples of applications, installation and programming are displayed with a gray background.
2  Safety

⚠️ Warning

**Electric voltage!**
Direct or indirect contact with live components can cause dangerous currents to flow through the body, which may result in electric shock, burns or even death.
- Always disconnect the main power supply prior to installation and/or disassembly.
- Work on the 110 V - 240 V supply system must be performed only by qualified personnel.

⚠️ Caution

**Risk of damaging the device due to external factors!**
Moisture and contamination can damage the device. That is why the device must be protected against humidity, dirt and damage during transport, storage and operation.

2.1  Intended use
The device must only be operated within the specified technical data!

The device is used for door communication and video transmission. Setting up the device requires an external device (laptop).

2.2  Improper use
The device is dangerous if used improperly. Any non-intended use is deemed improper use. The manufacturer is not liable for damages resulting from such improper use. The associated risk is borne by the user/operator.

2.3  Target groups and qualifications
Installation, commissioning and maintenance of the product must only be carried out by trained and properly qualified electrical installers. The electrical installers must have read and understood the manual and follow the instructions provided. The operator must adhere to the valid national regulations in his country governing the installation, functional test, repair and maintenance of electrical products.

2.4  Liability and warranty
Improper use, non-observance of this manual, the use of inadequately qualified personnel, as well as unauthorized modification excludes the liability of the manufacturer for the damages caused. It voids the warranty of the manufacturer.

3  Environment

🗑️️ Consider the protection of the environment!

Electric and electronic devices must not be disposed of with household waste.
- The device contains valuable raw materials that can be recycled and should be disposed of at an appropriate recycling facility.

All packaging materials and devices bear the markings and test seals for proper disposal. Always dispose of the packaging material, electronic devices and their components via authorized recycling facilities or disposal companies.
4 Integrating mobile end devices with ABB Welcome IP-Gateway

4.1 System requirements

Note
Please note that the IP-Gateway must be connected to the router by a LAN cable.

The following system requirements are necessary for smooth operation of the IP-Gateway:

Components for the IP-Gateway
The following components are required to operate the IP-Gateway:
- A Welcome door entry system including at least one outdoor station and one system controller
- IP network (should connect mobile devices, must have a WLAN connection)
- An outdoor station with camera must be integrated for video transmission

As tenants
As tenants, the following items are helpful for operation with the IP-Gateway:
- Tablet PC or similar device with an iOS or Android operating system for the installation of the App with an Internet connection via 3G/UMTS or WLAN. The data rate (e.g., a flat rate) must allow for Voice over Internet Protocol ("VoIP") connections.
- Laptop, tablet PC or similar device with an Internet browser for access www.my-abb-livingspace.com for the configuration of the IP-Gateway in the home network.

Mobile App
If you want to use the Welcome mobile App from the Internet, the following requirements must also be met:
- DSL-6000 Internet connection or faster
- Minimum 3G (UMTS) mobile Internet

Note
An Internet connection slower than ADSL 6.000 or 3G/UMTS impairs the quality of video streaming from the IP-Gateway to the app.

4.2 IP-Gateway start-up
The IP-Gateway has a user interface that can be reached via an Internet browser. The user interface can be opened from every computer that is part of the same network as the gateway that is to be configured.

For the initial startup of the IP-Gateway, a few basic settings need to be made in this user interface.

Two options are available to you for commissioning:

<table>
<thead>
<tr>
<th>Commissioning</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Option 1 - UPnP</td>
<td>Commissioning with the Windows UPnP service (Windows Vista or higher)</td>
</tr>
<tr>
<td>Option 2 - IP address</td>
<td>Enter IP address directly</td>
</tr>
</tbody>
</table>

Information regarding documentation
The Windows 7 interface is used to describe the configuration options.
4.2.1 Option 1: Commissioning with the Windows UPnP service

Preconditions:
- There is a DHCP server on the network, e.g., integrated in the router.
- The IP-Gateway is connected to the router by a LAN cable.
- The PC is connected to the router by a LAN.
- The IP-Gateway is connected and ready for operation.

1. Open Windows Explorer.
2. Click the "Network" entry below the displayed drives.
   The window pane on the right now displays all devices currently on the network.
3. Double-click the IP-Gateway icon.
   A browser window with the configuration interface automatically opens.
Note
If the browser does not open automatically, the device properties appear instead. Copy the displayed IP address, e.g., 192.168.0.180, and enter it manually into the browser's address bar.

Note
If the IP-Gateway icon can’t be found, try turning off the Windows firewall. If you still can’t find the IP-Gateway icon, proceed to Option 2.
4.2.2 Option 2: Entering the IP address directly

Preconditions:
- There is a DHCP server on the network, e.g., integrated in the router.
- The IP-Gateway is connected to the router by a LAN cable.
- The PC is connected to the router by a LAN.
- The IP-Gateway is connected and ready for operation.

1. Link the external device in a common network to the IP-Gateway.
2. Launch the control panel.
3. Get the DHCP server address according to the following steps.
   For example: the DHCP server address is 192.168.1.1.

4. Open the user interface of your router.
   Enter the DHCP server address directly into the address line of your browser to see a list of all connected devices, including their names and IP addresses. Copy the IP address of the device "IP-Gateway."
5. Enter the IP address of the gateway directly into the address line of your browser to call up the user interface of the gateway.

Enter the default values in the "User name" and "Password" input fields. (default values):
User name: admin
Password: admin

Click the "Login" button to display the configuration menu.
4.3 Setup of the mobile devices with IP-Gateway

4.3.1 Step 1: Registering and logging into www.my-abb-livingspace.com

ABB portal Login

2. Input a username, password and email to receive your activation link.
3. Read and accept both of the items.
4. Click the “register” button.
5. Activate your user account via email.

4.3.2 Step 2: Connecting the IP-Gateway at www.my-abb-livingspace.com

In the web interface of the IP-Gateway, in menu Portal Login, enter your data and the name of the IP-Gateway. Click on the login button to connect.
4.3.3  Step 3: Installing the "Welcome" App

You can download the ABB Welcome App from Google Play or the Apple App Store by entering keyword "ABB Welcome."

4.3.4  Step 4: Coupling the IP-Gateway and "Welcome" App

Smart phone: Open the Welcome APP

1. User
   abc123

2. Password
   ●●●●●●

3. Friendly Name
   SM-N9009

4. Version: 2.0.0
   Network settings
   System settings
   Ringtone building
   Ringtone apartment
   Reset Application
   Quit

5. Select the IP gateway to pair

   IP-Gateway: "App management" configuration page displays the pairing request, click the "handle" button.
1. Open the App, and enter the data for access to www.my-abb-livingspace.com. Click the Login button to connect the App with the portal.

2. In the App, select menu Settings and then Manage IP-Gateway or Network settings.

3. Click the IP-Gateway you wish to couple and note the security code (integrity code) displayed.

4. In the web interface of the IP-Gateway, select menu item App management and select your mobile terminal device via the edit button. If the desired device is not in the list, update it via the Update button.

5. You can now assign the desired access rights to the App of the respective device.

6. Complete the coupling by entering the security code (integrity code).
5 General function of home page

All configurations are set in the browser interface.

5.1 General buttons in the configuration

"Log off" button
Click the "Log off" button at the top right to leave the configuration interface as a logged-on user.
You can leave the configuration interface at any time.

"Reset" button
If you have entered incorrect data in the input fields, click the "Reset" button to clear all your entries.
All input fields are cleared, and you can enter your data again.

"Save" button
Click the "Save" button to save your entries and to continue to the next configuration page.

Switching to a new configuration page
Click the individual configuration pages in the left column of the configurations to switch to the required configuration page.

5.2 Login

Fig. 5: Login window
The IP address shows you the IP address currently used by the device.
The MAC address shows you the MAC address currently used by the device.

Language
The default language is English. Select the flag for other language options.

User name
Enter the default values in the "User name" and "Password" input fields.
(default values):

User name: admin
Password: admin

"Login" button
Click the "Login" button to display the configuration menu.
The window with the network information appears.
5.2.1  RESET

Note
If you forget your user name and password, you can reset the IP-Gateway back to its factory settings.

The "Reset" button is located on the front of the IP-Gateway behind a flap.

Performing the reset
1. Press the "Reset" button for at least 3 seconds.

Fig. 6: Location of the Reset button
6 Configuration for IP-Gateway

6.1 Network information

The network information appears after logging in.

The "Network information" page displays the IP-Gateway settings currently used.

**IP address**
The IP address is the address for accessing the connected IP-Gateway.
You need this address to log into the configuration interface!

**Portal client information**
Display the connection status between IP-Gateway and server.

**Date and time synchronization**
Display the status of the date and time synchronization.

**Note**
Note the displayed IP address to log into the configuration again, e.g., after restarting the system when creating other user accounts.
6.2 "Network configuration" page

You can configure your device as required on the "Network configuration" page.

**DHCP**
Select "DHCP" for the device to automatically obtain an IP address.

**Static IP address**
Please note that the IP address of the gateway does not change when a static address is assigned. A static IP address only needs to be assigned in exceptional cases to manually configure the network. Click the "Static IP address" check box to enter the following addresses: IP address, network mask, default gateway and DNS.
You can adjust the basic settings for the IP-Gateway on the "Basic settings" configuration page.

**Address of the indoor station**
The address of the indoor station indicates which call button on the outdoor station is used to control the IP-Gateway.

- **Note**
  Up to four terminal devices, including smart phone, tablet and **Busch-ComfortTouch®**, can be connected with one IP-Gateway inside one apartment.

**Default outdoor station**
The address of the default outdoor station is the station set as the preferred outdoor station. One audio and video connection also without incoming door call can be set up for this station.

**Master and slave mode**
When more than one indoor station is installed in the apartment (same address), one station must be configured as master and all others as slaves.

**Default Light Address**
The address of the light indicates the address of switch actuator (M2305)

- **Note**
  Switch actuator (M2305) must work on “Time relay mode,” and a light or a lock can be connected with it. You can control this light or lock with the button on the Welcome App interface. (For details about the switch actuator, please refer to the M2305 user manual.)
6.4  "Change password" configuration page

You can change the password on this configuration page.

**Current password**
Enter the password previously used.

**New password**
Enter your new password.

**Confirm new password**
Enter your new password again.

**Note**
You can only change the password for the current active user. Please follow the general recommendations for generating strong passwords.
6.5 "Device settings" configuration page

All outdoor stations to be connected to the IP-Gateway (max. 9) must be listed in the *Device settings*.

**Add device:**
You can add individual devices on this page.
See “Add devices” section below for details.

The configuration page displays a list of added devices.

**ID**
The ID is the sequential number of the device.

**Modify**
Click the "Modify" button to change your settings.
The current settings appear and can be modified.

**Delete**
Click the "Delete" button to remove a user from the list.

**Device type**
This is the device type description.

**Device ID**
The ID is the address of the outdoor station. (If there is only one outdoor station, the ID as a rule is 1.)

**Name**
When using the Welcome App, the name is shown.

**Default lock**
The default lock is set as the preferred lock of the outdoor station, which will be released when you press the button on the Welcome App.
6.5.1 Add device

Fig. 12: "Add device" configuration page

**Device type**
Select the required device type from the "Device type" drop-down list.

Note
The floor call button is already set up as the default device. The device name can be adjusted as required.

**Device ID**
Enter the address set on the first control dial of the outdoor station (1–9).

**Name**
The device name, e.g., for incoming calls, appears on the display of the mobile device or Busch-ComfortTouch®. Assign intuitive names, e.g., "Front door."

**Permission**
The option to automatically record images (snapshots) is permitted, and can be specified for each outdoor station individually.

Note
Making and saving video recordings can infringe on personal rights! Always observe applicable legal and labeling requirements for placement and operation of video components!

**Default Lock**
Enter the lock number, lock 1 or lock 2. Lock 1 indicates the default lock for outdoor station, and lock 2 indicates the second lock. (Please refer to the outdoor station user manual for setting the default lock/second lock.)
6.6 "Portal Login" configuration page

2. Input a username, password and email to receive your activation link.
3. Read and accept both of the items.
4. Click the "register" button.
5. Activate your user account via email.
6. Login with the username and password on the "Portal Login" configuration page.

**Friendly Name**
Name for this IP-Gateway, which will display in the device list of your smartphone, e.g., IP-Gateway.
6.7 "App Management" configuration page

Fig. 14: "App Management" configuration page

Pair IP-Gateway and smart phone:
Operating Instructions

ABB Welcome®

1. Smart phone: Open the Welcome App

2. Click the login button.

3. Android: select “Network settings”
   iOS: select “Manage IPGW”

4. Select the IP-Gateway to pair

5. IP-Gateway: "App Management" configuration page displays the pairing request, click the “Handle” button.
Modify
Click the "Modify" button to change your settings.
The current settings appear and can be modified.

Delete
Click the "Delete" button to remove a user from the list.
6.8 "Associated ComfortTouch 2.x" configuration page

Fig. 15: "Associated Busch-ComfortTouch® 2.x" configuration page

The IP-Gateway can be used to control Busch-ComfortTouch® series 2.x. The Busch-ComfortTouch® firmware must be version 2.4 or higher.

1. Create a user, e.g., ComfortTouch1.
2. Set the compatibility mode to "Yes."
3. Enter the IP address of the Busch-ComfortTouch® in the "ComfortTouch 2.x address" field.
4. Create a configuration project in IPP 2.4 for the Busch-ComfortTouch®, "Door communication" application page.
5. Enter the IP address of the IP-Gateway in the "Outdoor station" tab in the "Outdoor station IP address" menu box.
6. Enter the address of the outdoor station.

Note
If you want to remove a Busch-ComfortTouch® 2.x that is already connected to the Welcome system, simply set compatibility mode to "No." The address does not have to be deleted.
6.9 "Associated ComfortTouch 3.x" configuration page

The IP-Gateway can be used to control Busch-ComfortTouch® series 3.x. You can create up to three new users and administer your user settings on this configuration page.

**ID**
The ID is the sequential number of the user.

**User name**
All assigned accounts are displayed under "User name." Several devices can be logged in under each account. You have the option of deleting the user or editing the settings.

**Add user**
Click the "Add user" button to create a new user.

1. Click the "Add user" button.
The description of the "Create new user" configuration page explains this function.

**Modify**
Click the "Modify" button to change your personal user settings.
The "Add user" configuration page opens. The current user appears and can be edited.

**Delete**
Click the "Delete" button to remove a user from the list.
6.9.1  "Add user" configuration page

The "Add user" configuration page opens.

**User name**
Enter the name of the new user in the "User name" input field.
A total of three different users with different roles can be created.

**Password**
Enter the required password of the new user in the "Password" input field.

**Confirm**
Enter the required password of the new user again in the "Confirm" input field.

**Note**
When specifying the user name, use only letters and numbers. Spaces and special characters are not allowed.

**Permission**
You can assign the following permissions to the user: surveillance, unlock and switch light.

**Surveillance**
The user can use ComfortTouch to establish a video connection to the outdoor station without there being a door call.
Unlock
Specify if the door may or may not be opened by ComfortTouch.

Switch light
This function is only available if the lighting, e.g., the staircase lighting, can be switched on/off directly from the Welcome system.

Note
The lighting is connected by a switch actuator (M2305).

Save new user
1. Click the "Save" button.
   The new user is saved.
6.10 "Import/Export configuration file" configuration page

Note
The option to create and replace an IP-Gateway configuration file is for service purposes. For details, please contact your electrical installer.
6.11 "Firmware Update" configuration page

The IP-Gateway has the option to manually update the device software.

**Note**  
Device updates are not normally required and should only be performed for troubleshooting purposes. To update the device, please contact your electrical installer.

**Note**  
Before updating the firmware, always check if the update has a date more recent than the software already installed. See the section "Version information."

**Note**  
All settings of the IP-Gateway will be reset to the factory settings during the update. Before updating, please first make a note of all the details specified under basic settings and device settings.

Perform the following steps to update your device, if necessary.

1. Get the latest software from your electrical installer.
2. Log into www.my-abb-livingspace.com with the username "admin" and the associated password. Open menu item firmware update and upload the .tar file.
3. After the file has been sent to the IP-Gateway and installed on the device, the IP-Gateway is reachable again via the browser.  
   ATTENTION: This process may take up to 10 minutes. The device must not be disconnected from the power supply during this period.
4. Afterward, the IP-Gateway can be put into use again.  
   The user name and password have been reset to the factory settings admin and admin. Assign a new password if necessary.  
   Re-enter the configuration data you noted before the update (basic settings, device settings).  
   Set the time zone.
Note
In case of a fixed IP address, there is the possibility that the device has obtained a new address via DHCP after the software update. For a new assignment of the IP address, please observe the details in chapter 5 of the IP-Gateway manual.

6.12 "NTP settings" configuration page

The NTP (Network Time Protocol) settings are used to define with which time signal the IP-Gateway is synchronized.

There are two options for synchronization:

**Synchronization via the Internet**
1. Select the Internet time (NTP) setting.
2. Add an NTP server.
   - Five NTP servers will be connected automatically one by one.
     - pool.ntp.org (default server)
     - time.nist.gov
     - ntp.Apple.com
     - time.windows.com
     - time-a.nist.gov
3. Set the time zone for your location.
4. Save your entries.

**Note**
In order to synchronize successfully, please make sure the Internet connection is available before power on.

**Synchronization via Busch-ComfortTouch® 3.x or by mobile device**
1. Select the setting from the App or Busch-ComfortTouch® 3.x.
   - The IP-Gateway takes its time settings from the panel or from a mobile end device.
6.13 "Version Information" configuration page

The "Version Information" configuration page provides information about the hardware and software components of the IP-Gateway and is required for service purposes or error diagnostics.

**Note**

Before updating the firmware, always check if the update has a more recent date than the software already installed.

The firmware creation date is in the file name and version information in the format YYYYMMDD.

![Figure 21: "Version Information" configuration page](image)

![Figure 22: Creation date, position of the firmware](image)
7 Configuration for telephone gateway

Via one IP-Gateway, the computer or laptop can configure all parameters configured by telephone.

1. Enter the homepage:

Fig. 23

<table>
<thead>
<tr>
<th>No.</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>The default language is English. Select flag for other language options.</td>
</tr>
<tr>
<td>2</td>
<td>Select Telephone Gateway from device list</td>
</tr>
<tr>
<td>3</td>
<td>Click “Login” to enter the next level</td>
</tr>
</tbody>
</table>
Operating Instructions
ABB Welcome®

2. Start searching the device

Fig. 24

<table>
<thead>
<tr>
<th>No.</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Click &quot;Refresh&quot; to search all existing telephone gateways.</td>
</tr>
<tr>
<td>2</td>
<td>Click &quot;Exact Search&quot; to search the targeted telephone gateway. Telephone gateway number must be input first.</td>
</tr>
</tbody>
</table>

3. The result of searching is displayed as follows:

Fig. 25
4. Select a Telephone Gateway device in the list, and input the password. Default password: 1234.

![Password Input Screen](image)

5. If the password is correct, it will display as follows:

![Gateway Interface](image)

<table>
<thead>
<tr>
<th>No.</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Click &quot;Edit&quot; to change the password (4 digits).</td>
</tr>
<tr>
<td>2</td>
<td>Installer can select &quot;Enable&quot; or &quot;Disable&quot; for direct acceptance from the list.</td>
</tr>
<tr>
<td>3</td>
<td>Installer can enable or disable &quot;Call Divert for All Indoor Stations.&quot;</td>
</tr>
<tr>
<td>4</td>
<td>This admin password is used when user logs in at TGW.</td>
</tr>
<tr>
<td>5</td>
<td>Installer can edit default phone number directly with maximum 16 digits.</td>
</tr>
<tr>
<td>6</td>
<td>Installer can enable or disable &quot;Indoor Station PIN Active for all Indoor Stations.&quot;</td>
</tr>
<tr>
<td>7</td>
<td>All indoor station numbers are listed from 1 to 250.</td>
</tr>
</tbody>
</table>
| 8   | Installer can select "Yes" or "No" from "Existing" according to actual installation.  
   a. If "Yes" is selected, all parameters to the right can be edited.  
   b. If "No" is selected, all parameters to the right are deleted, which means this indoor station is deleted from the indoor station address. |
<p>| 9   | Installer can select &quot;Enable&quot; or &quot;Disable&quot; from &quot;Indoor Station PIN Active.&quot; |
| 10  | Installer can select &quot;Default,&quot; &quot;Primary&quot; or &quot;Secondary&quot; from &quot;Call Divert Number Active.&quot; |
| 11  | Installer can edit primary and secondary phone numbers, with maximum 16 digits. |
| 12  | Installer can edit indoor station (4 digits). |
| 13  | Click &quot;Export,&quot; and all current parameters of the telephone gateway are exported to *.txt. If the installer made a modification but didn't click &quot;Send&quot;, before clicking &quot;Export,&quot; the original parameters are exported. |</p>

<tbody>
<tr>
<td>14</td>
<td>After importing, the installer must click &quot;Send&quot; to send these parameters to telephone gateway. (This is only for replacement in field.)</td>
</tr>
<tr>
<td>15</td>
<td>Click &quot;Import&quot; to import parameters from a file in *.txt format. The file contains a JSON data structure. To create a proper import file, export an example to have a template for the necessary structure.</td>
</tr>
</tbody>
</table>
| 16 | Click "Reset & Send," and a double-confirmation window will pop up.  
 | a. | Click on "OK" to reset to factory setting. Factory setting is also sent to telephone gateway.  
 | b. | Click on "Back" to cancel. |
| 17 | Click on "Logout" to exit without sending the modification to telephone gateway. |
8 Integrating mobile end devices with the Welcome App

You can add end devices to the ABB Welcome system from the Welcome App. The Welcome App is available in two versions and supports the iOS and Android operating systems.

You can download the ABB Welcome App from Google Play or the Apple App Store by entering keyword "ABB Welcome."

8.1 Android version 4.0 or higher

Figure. 28: Android Version 4.0 or higher

1. Install the Welcome App from Google Play on your smart phone or tablet PC.
2. Open the App and enter your data to log into www.my-abb-livingspace.com.
4. Set the permission of this App.

See section “App Management” for more details.
8.2 iOS version 4 or higher

1. Install the Welcome App from the Apple App Store on your smartphone or tablet PC.
2. Open the App and enter your data to log into www.my-abb-livingspace.com.
4. Set the permissions of this App.

See section “App Management” for more details.
Operating Instructions
ABB Welcome®

9  Network security

This product is designed to be connected to and to communicate information and data via a network interface. It is your sole responsibility to provide and continuously ensure a secure connection between the product and the network. You shall establish and maintain any appropriate measures (such as, but not limited to, the installation of firewalls, application of authentication measures, encryption of data, installation of anti-virus programs, etc.) to protect the product, the network, its system and the interface against any kind of security breaches, unauthorized access, interference, intrusion, leakage and/or theft of data or information. ABB and its entities are not liable for damages and/or losses related to such security breaches, any unauthorized access, interference, intrusion, leakage and/or theft of data or information.

10 Integrating a Busch-ComfortTouch® 3.0 or higher

The Busch-ComfortTouch® series 3.0 or higher can be connected to a Busch-Welcome® system directly via the IP-Gateway.

1. Create a user, e.g., ComfortTouch1, in the IP-Gateway. See section "Create new user."
2. Create a configuration project in IPP 3.x for the Busch-ComfortTouch®, a "Door Entry" application page.
3. Enter the "IP-Gateway address" and user in the "IP-Gateway" tab.

Note ...
A detailed user description is available in the IPP online help.

11.3 Dimensions and dimensional drawing
The dimensions of the IP-Gateway are indicated in the following image.

Fig. 34: Dimensional drawing

The depth of the device is 2.56".
The module width is 0.39".
Operating Instructions
ABB Welcome®

12 Product overview

12.1 Device setup
The IP-Gateway is a Welcome door communication system and is used for door and video transmission.
- The IP address makes communication possible between the Welcome door communication and the local IP network.
- It also allows use of the Busch-ComfortTouch® as door communication between the indoor station and the Welcome App.
- The product connects to www.my-abb-livingspace.com. It can be used to configure other Welcome products using a web browser.
13 Installation and electrical connection

**Warning**

**Electric voltage!**
Direct or indirect contact with live components can cause dangerous currents to flow through the body, which may result in electric shock, burns or even death.

- Always disconnect the main power supply prior to installation and/or disassembly.
- Work on the 110 V - 240 V supply system must be performed only by qualified personnel.

13.1 Requirements for the electrician

**Warning**

**Electric voltage!**
Install the device only if you have the necessary qualifications.

- Incorrect installation endangers your life and that of the user of the electrical system.
- Incorrect installation can cause serious damage to property, e.g., due to fire.

The minimum necessary expert knowledge and requirements for the installation are as follows:

- Apply the "five safety rules" (DIN VDE 0105, EN 50110):
  1. Disconnect from power;
  2. Secure against being re-connected.
  3. Ensure there is no voltage.
  4. Connect to earth and short-circuit.
  5. Cover or barricade adjacent live parts.
- Wear suitable personal protective clothing.
- Use only suitable tools and measuring devices.
- Check the supply network type (TN system, IT system, TT system) to secure the following power supply conditions (classic connection to ground, protective earthing, necessary additional measures, etc.).

**Warning**

**Electric voltage!**
Risk of death and fire due to electrical voltage of 100 V - 240 V.

- Work on the 100 V – 240 V supply system may only be performed by authorized electricians.
- Disconnect the main power supply prior to installation and/or disassembly.

13.2 Mounting
The IP-Gateway must only be installed on mounting rails according to DIN EN 50022. The IP-Gateway is latched onto the mounting rail.
