Carlon® retractable work surface receptacle
Carlon® retractable work surface receptacle
Conveniently puts power within your reach

With the variety of electronics and powered devices today, convenient power outlets in the home and office are critical. While phone chargers, laptops, appliances and other devices are typically located on work surfaces, outlets are often located underneath the work surface, along the wall or on the floor. Repeatedly accessing these outlets is an inconvenience and poses safety hazards.

The Carlon retractable work surface receptacle provides a convenient outlet right where you need it. An included hole saw attaches to your power drill to quickly mount the receptacle in a counter, desk or similar work surface. A 6-foot cord connects to an existing wall or floor outlet, so no wiring is required. Simply pull up the receptacle's cover to raise the unit above the work surface and plug in a device. When not in use, push the cover down to store the receptacle below the work surface. The black, non-metallic cover complements most home or office decor.
