Zirconia Oxygen Analyser Technician Training – Z453

The skills of operations and maintenance personnel play a key role in equipment performance as well as maximizing return on investment.

ABB Measurement Products' training facilities at the Stonehouse site deliver a programme of Instrumentation and Analyser training courses, specifically designed to meet client's needs.

Zirconia Oxygen Analyser Technician Training

The course is designed for engineers and technicians who are responsible for the day to day maintenance of ABB's Zirconia O2 analysers.

Students will gain an understanding of the analyser measurement principles, analyser hardware and software operation.

On completion of the training, students will have the ability to calibrate/validate the analysers. Interrogate the analyser controller, be able to interpret alarm/status messages and generally maintain the analysers on a day to day basis.

ZDT / ZFG2: Agenda Day 1: 09.00 – 16.00

Registration & coffee	09.00 – 09.30
Introduction	Welcome
Overview	Basic principles
Analyser hardware	Installation, controller & probes operation
Lunch	12.00 – 13.00
Calibration	Procedures
Maintenance & troubleshooting	Faultfinding techniques
Course review	15.30 – 16.00

AZ20 Range: Agenda Day 2: 09.00 – 16.00

Registration & coffee	09.00 – 09.30
Introduction	Welcome
Overview	Basic principles
Analyser hardware	Installation, controller & probes operation
Lunch	12.00 – 13.00
Calibration	Procedures
Maintenance & troubleshooting	Faultfinding techniques
Course review	15.30 – 16.00

Four easy ways to book
