

Standard metering control system

Built by the experts

- 1500+ metering supervisory systems
- 22000+ flow computers

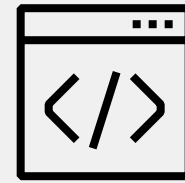

Fully customizable

- Engineering service to fulfill special needs
- Flexible interfaces to the DCS and accounting system

Global service and support

- By local ABB organizations and engineering centers in MY, US, NL
- Solution developed and maintained by ABB Spirit IT (Eindhoven, NL)

Modern

- Pure web technology (HTML5, CSS, JS)
- Secure access, data and communication
- High-Performance HMI
- OPC UA also for archives, alarms and events

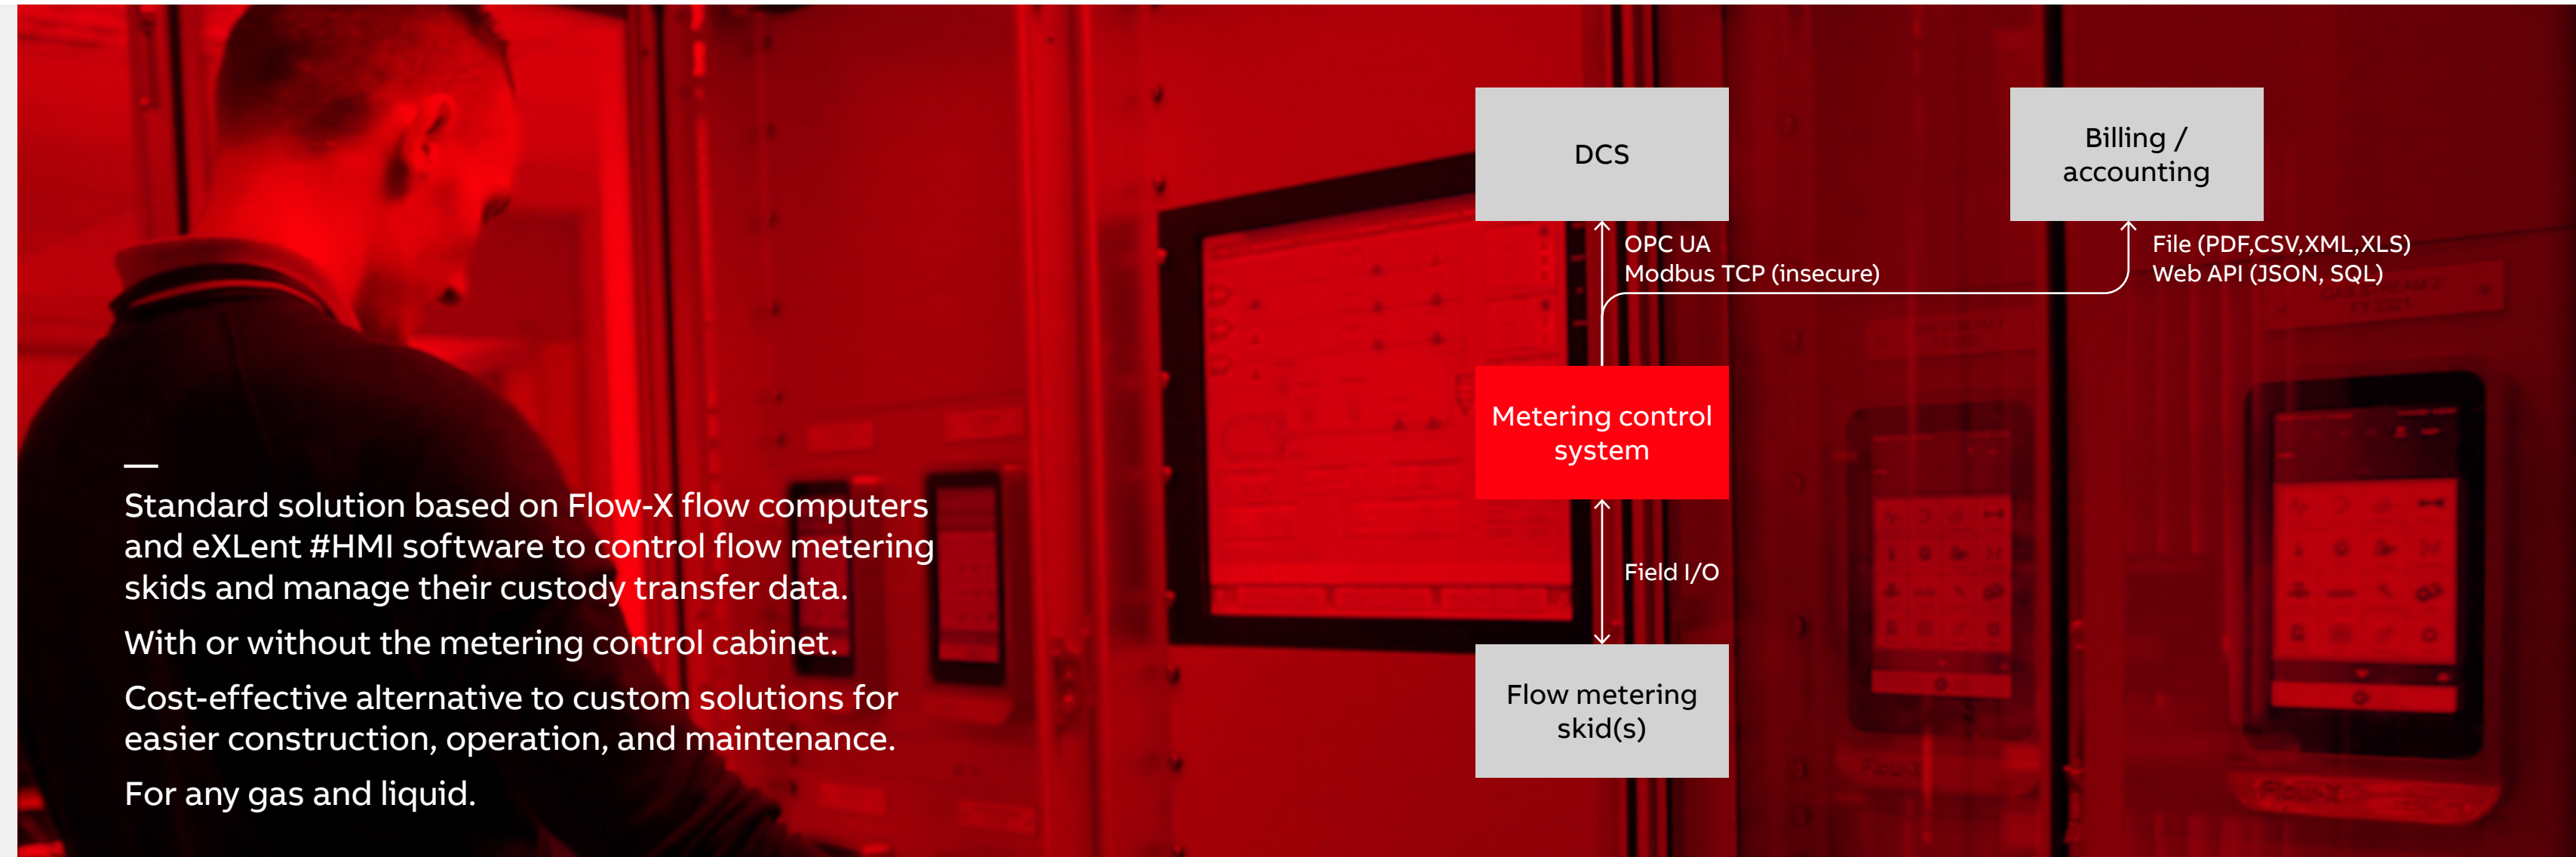

Complete

- Hot-standby redundancy
- Metering reports (batch, period, snapshot)
- Batch data and 4 sets of period data
- Long-term archive for flow computer data

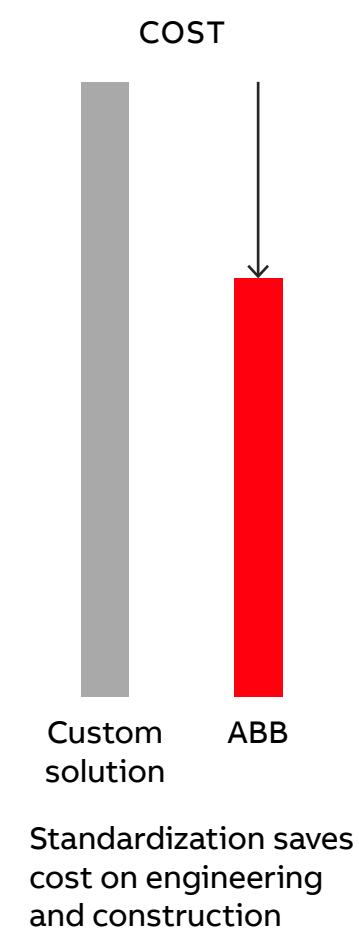

Compliant

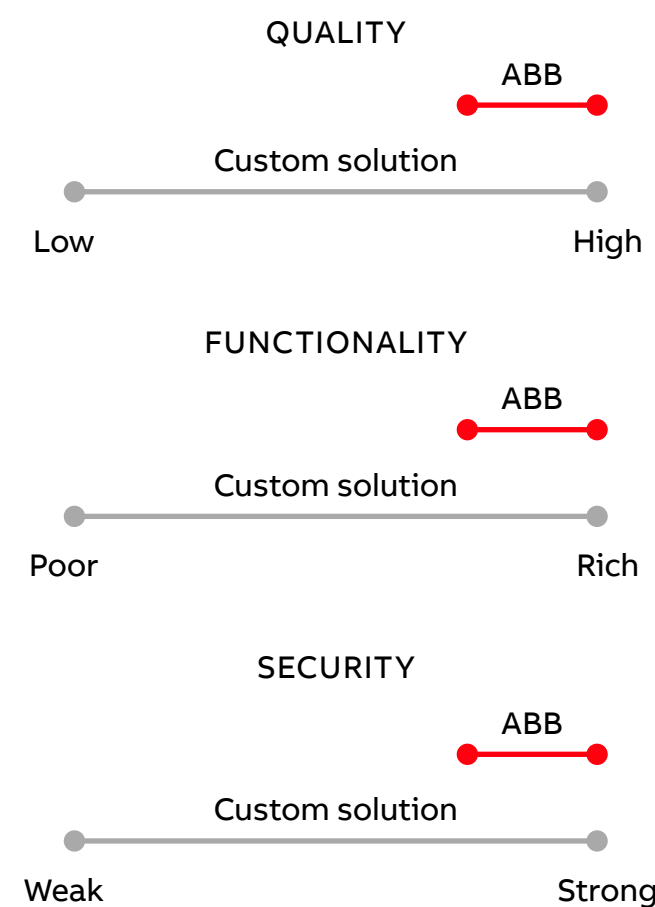

- MID certified
- Many national and company metrology certifications
- Latest flow and fluid calculations (API, AGA, ISO etc.)
- Cyber security compliance

Less cost

More value

The quality of a custom solution depends on the people that built it.

A custom solution only provides the functionality that is asked for.

The ABB solution provides secure access, communication and data.
