

BUSINESS AREA: PROCESS AUTOMATION

ABB Energy Industries

Facts & Figures

ABB's Energy Industries division is enabling safe, smart, and sustainable projects and operations for businesses across the oil, gas, chemicals, power generation, life sciences and water sectors. Driving integrated solutions that automate, digitalize, and electrify industry we connect our people and technology to help our customers adapt and succeed. With over 50 years domain expertise, we continue to innovate and reshape traditional approaches across the energy sector. Our technologies and solutions are designed to create value, improving operational efficiency and productivity, enhancing safety and minimizing risk.

Revenues

\$1,750-2,250 million

Market position

No. 1 automation conv. power¹
No. 3-5 automation OGC²

Key market drivers and trends

- **Automation leadership** – Competitive portfolio, domain expertise and project delivery capabilities that create value with ABB Adaptive Execution™
- **Digitalization acceleration** – Leveraging data analytics and AI to improve visibility and efficiency of operations and support customers towards remote and autonomous operations.
- **Energy transition** – global demand for more sustainable energy and the drive to embed sustainability into all aspect of operations

Market

~\$25 billion (combined sector market)
