

# Peace of mind without wasting a watt.

ABB drives for HVAC control the speed of pump, fan or compressor motors to optimize the comfort zone and lower energy use. The drives have advanced HVAC

[www.abb.com/drives](http://www.abb.com/drives), [www.abb.com/drivespartners](http://www.abb.com/drivespartners)

specific features and integrate seamlessly into building management systems. The BTL approved drives feature native BACnet embedded as standard and are easily

connected to BACnet/IP networks through an optional router. To improve your building's energy efficiency, safety and intelligence, call ABB.
