

YOU'RE INVITED:

Digital transformation from the field to the boardroom

On-demand webinars for distribution utilities

Join a select group of power industry stakeholders including asset developers & investors, major utilities, system operators, and regulators as they discuss key challenges and opportunities posed by the rapid growth of renewables in Europe.

Topics include:

- Understanding the dynamics and drivers of renewable energy technologies (RET) investment risk
- Outlook for access to financing and cost of capital for RET projects
- How major regulatory and policy considerations affect investment decisions
- How supporting technologies (e.g., DSM, storage, hydrogen) enable the transition to RETs

Our multidisciplinary industry experts share their insights to help you gain crucial grid knowledge today. Watch now!

DIGITAL DISTRIBUTION UTILITIES ARE ACCELERATING CUTTING-EDGE TECHNOLOGY INTEGRATION TO IMPROVE OPERATIONS – YOU CAN TOO.

Webinars to watch at your convenience:

- Establishing the pathway for the digital distribution utility
- Enabling a stronger, smarter and greener distribution grid
- Energy storage services for the digital distribution utility
- Multi-application communication networks in digital distribution
- How to manage mission-critical grid operations in real time with confidence
- Digital boardrooms: decision-making intelligence for digital utilities
