

BULLETIN

Reducer inlet AN25.20

For conduit reduction from Ø 25 to 20 mm

Enables easy conduit reduction from Ø 25 mm to Ø 20 mm.

The usage of Ø 25 mm conduits is increasing and all fixed inlets are Ø 16/20 mm in most installation/ junction boxes. To be able to connect the Ø 25 mm conduit to the installation/junction box, the conduits needs to be reduced to Ø 20 mm.

Reduction is easily done with normal AJ25 conduit extension just by adding the new AN25.20 reducer to AJ25 conduit extension.

Reduction also possible from Ø 25 mm directly to Ø 16 mm with AN20.16.

AN25.20 is possible to use with inlet AN25 but the reducer has to be cutted from the shown "relief" marked with red dotted line.

Type	EAN	Description	Package
NEW AN25.20	6438199005119	Reducer Ø 25/20 mm	100 / 500
AJ25	6410011301258	Conduit extension Ø 25 mm	50 / 250
AN25	6410011527252	Inlet Ø 25 mm	100 / 500
AN20.16	6410011527306	Reducer Ø 20/16 mmm	100 / 500

Environmentally friendly product

The product is made of recycled plastic which may cause the color to vary from grey to black, depending on the manufacturing batch. Made of halogen free material (IEC/61249-2-21).
