• Long Range SFP for distances up to 20 km
• Suitable for all EDS500 devices with SFP slots (MSA)
• Simplex LC connector / Single-mode fiber
• Monitors the optical signal quality / Alarm generation before link loss
• Bidirectional transceiver, only one fiber used

Application
The Long Range SFP is a pluggable optical transceiver for fiber optical transmission lines of up to 20 km range. A minimum attenuation is not required.

This SFP type supports monitoring the receiver input power, as well as the transceiver temperature and voltage (via DOM, Digital Optical Monitoring). Additionally, with this SFP type, the optical signal quality and attenuation can be monitored (for instance via SNMP if supported by host). A signal quality threshold can be defined, to enable alarming even before the optical link is lost (due to material aging or similar).

Bidirectional transceivers can only be used in pairs on a fiber optical transmission line (type SDM with type SUM).
## Technical data

### Power budget
- Minimum output power: -15 dBm
- Maximum output power: -8 dBm
- Receiver sensitivity: -28 dBm
- Minimum power budget: 13 dB

### General Characteristic
- Data Rate: 100 Mbps Ethernet (125 MBaud)
- Range Classification: Long Range (LR) / 20 km
- Connector: Simplex LC
- Connector Contact Type: Physical Contact (PC)
- RoHS Compliant: Yes

### Environmental conditions
- Nominal operating temperature range: 0°C...70°C
- EN 60068-2-1, -2-2, -2-14
- Relative humidity: 5%...95% (non condensing)
