MDDC-drives-SELE 1001

1. CURRENT LIFECYCLE STATUS

The MDDC-drives SELE 1001 is in the limited phase of the ABB Drives lifecycle plan. It is planned to remain in this phase until 2014.

2. SUPPORT AVAILABILITY FOR MDDC-DRIVES SELE 1001

In the limited phase product manufacturing is no longer supported by development and the product service support is limited.

The following productized services are available:

- spare part service continues as long as the components are available
- off-site repair services (refurbished parts and electronics repair)
- off-site technical support and on-site repair service
- recommended replacement with an active product (ABB recycling services are to be utilised where available)

3. LIFECYCLE PLAN

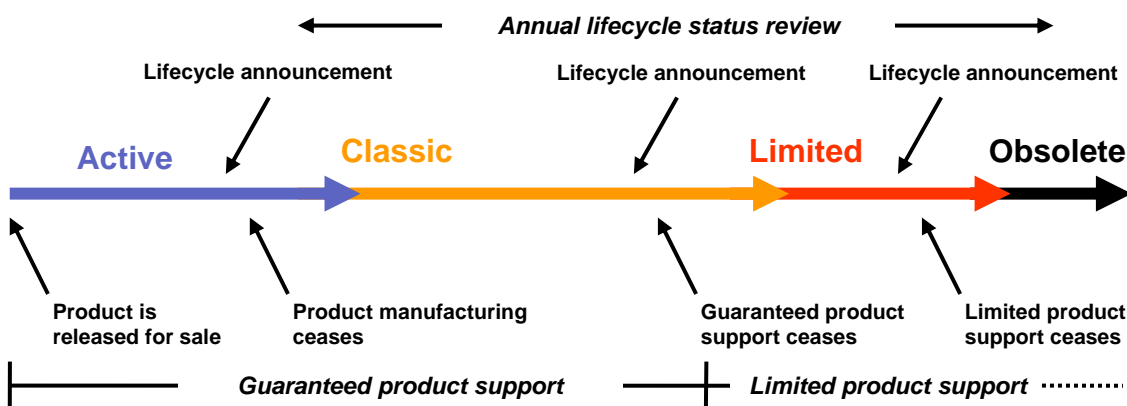

ABB's plan is to support the MDDC-drives SELE 1001 until the end of 2014 and even beyond, depending on the availability of components. Towards the end of the limited phase use of refurbished materials for continued support will increase.

The MDDC-drives SELE 1001 is planned to be transferred to the obsolete phase in 2015. In the obsolete phase the product will no longer be supported. However spare part deliveries are limited to the existing stock.
