

**Model 3100 Series Obsolescence Notice**

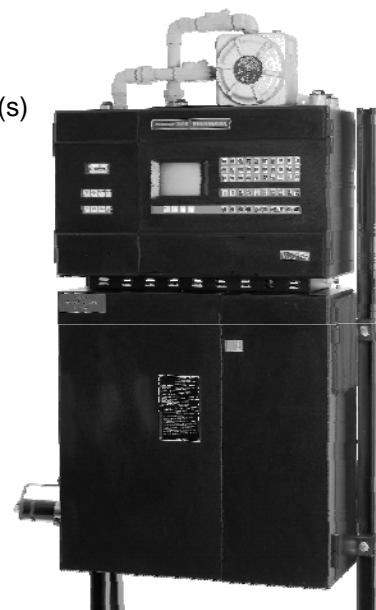

Reference No: MB-0708-01

**Description: Model 3100 Series Limited Parts Availability**

ABB installed base data indicates ABB PGC 3100 Series Process Gas Chromatograph(s) are currently utilized in your process. Please contact us if you no longer have this analyzer installed or for general questions regarding this service note.

ABB PGC 3100 Process Gas Chromatographs have been declared obsolete by the factory. Some parts for this series are no longer being manufactured. To ensure continued reliable operation of this analyzer, a spare parts audit is highly recommended.

To schedule your ABB Service on-site audit, please complete the information below and return via email or fax. The site audit will allow ABB to evaluate your existing parts inventory and to suggest replacement and upgrade options.
