

## Cut CO<sub>2</sub> emissions by 180 million tons a year?

In 2009 alone, the power saved by the installed base of ABB drives cut global CO<sub>2</sub> emissions by 180 million tons. This intelligent motor control system that adjusts the speed and reduces the amount of energy used by motor-driven equipment is just one of many ABB power and automation solutions to manage energy consumption efficiently, reduce carbon emissions and bring savings to our customers.
