

Robotics Services

Extended warranty+

Extend your equipment's warranty with full control of your maintenance budget. ABB skilled technicians and original spare parts will make sure you have the highest uptime. By connecting your Robots with ABB Ability Connected Service's Condition Monitoring & Diagnostics (up to 5 years from delivery) you will further improve your performances.

Extend the warranty of your ABB robots with the flexible extended warranty+

The extended warranty+ can be bought either immediately with the new robot or at any time during the standard warranty period.

It offers longer peace of mind and lowers the downtimes of your operations, as it provides you with parts and labor to get the equipment back to work.

You can choose between 8 different lengths of extension for your warranty. (6, 12, 18, 24, 30, 36, 42 or 48 months can be added to your standard warranty.) When you extend your warranty, it is mandatory to ensure your robot is maintained according to ABBs standards every year. We are happy to offer a comprehensive Maintenance agreement for full peace of mind for you. Are you interested in safeguarding your valuable equipment even longer? Reach out to us and extend your warranty today.

Benefits
